

User manual

Performance reporting and review for the Department of Sport, Arts and Culture and the public entities it funds. One chapter for each person who uses Vuka, step by step, with screenshots.

Version 3, 19 September 2026. Screenshots are from a demonstration copy of Vuka: the 28 entities and their allocations are real; quarterly figures, reviews and names are illustrative.

Contents

- 9. J5. The citizen view
- 0. Working together
- 1. Presenting Vuka

Introduction

Vuka in one minute

The Department of Sport, Arts and Culture (DSAC) funds 28 public bodies: museums, theatres, arts councils, libraries, sport and language bodies. Every quarter each of them must tell the Department what it achieved against the targets it promised. Vuka is where that happens.

- **Entities report** their figures, and attach the document each figure came from.
- **The Department checks** them, starting with the entities most at risk, and approves them or sends back the ones it doubts.
- **Leadership sees** the whole portfolio at a glance, and can ask questions in ordinary words.
- **The public sees** what each published body was given and what it delivered.

Words you will see

Word	What it means
Entity	One of the 28 bodies DSAC funds, for example Iziko Museums or Boxing South Africa
Quarter	A three-month reporting period. Q1 is April to June, Q2 July to September, and so on
Target	Something the entity promised to deliver this year, for example "12 exhibitions mounted"
Figure	What the entity says it actually delivered against a target this quarter
Evidence	The document behind a figure: an attendance register, a signed report, an invoice
Confirm	The reporter's promise that a figure is right. It is recorded in their name and cannot be edited
Submit	Sending the whole quarter to the Department
Return	The Department sending back one or more figures it doubts, with a reason
Unverifiable	A figure with no evidence attached. It cannot be checked at all
Risk score	A number from 0 to 100 saying how much attention an entity needs. Always explained, never a black box
Published	Visible to the public. Nothing is public until the Department publishes it
Karabo	The assistant. Ask it a question and it answers from Vuka's records, with its sources

This manual has one chapter for each kind of person who uses Vuka. Find yourself in the table and start there.

If you are	You want to	Read
Anyone	Open Vuka, choose your language, sign in	Getting in
Anyone	Ask a question in ordinary words	Asking Karabo
A DSAC administrator	Set deadlines, give an entity its reporter account, connect Microsoft 365, choose what the public sees	Setting up: the administrator
A reporting officer at an entity, at a desk	Report the quarter from the Excel template	J1. Reporting from your desk
A reporting officer on a phone	Report the quarter one question at a time, on mobile data	J2. Reporting from a phone
A DSAC reviewer	Decide which submissions to look at, then approve or return them	J3. Reviewing submissions
A DSAC executive	See the whole portfolio, explain any one entity, ask a question	J4. The portfolio view
A member of the public	See what an entity was given and what it delivered	J5. The citizen view
Anyone signed in	Keep documents, set and close tasks, read the audit trail, work offline	Working together
Presenting Vuka	Run the demonstration in order, and know what each screen answers in the brief	Presenting Vuka

How the journeys connect

A quarter moves through Vuka in one direction, and each chapter picks it up where the last one left it.

1. The **administrator** sets the due date, issues the entity's reporter account and, when the Department decides to, publishes the entity.
2. The **reporter** is warned as the due date approaches, fills in the figures, attaches evidence, confirms each figure and submits.
3. The **reviewer** checks each figure against its evidence, then approves the submission or returns the figures they dispute. A returned figure goes back to the reporter, who answers it and submits again.
4. The **executive** reads the result across all 28 entities, and can ask Karabo a question in ordinary words.
5. The **public** sees what was allocated, promised and delivered for each published entity.

Two rules hold throughout, and they explain most of what the screens say:

- **A confirmed figure cannot be edited.** Not by the reporter, not by the reviewer. If a figure is wrong, the reviewer returns it and the reporter confirms a corrected one. Both stay on the record.
- **A figure with no evidence is "unverifiable".** That is different from "unverified". Attach the attendance register, signed report, photograph or invoice that the number came from.

Opening Vuka

Surface	Address	Who
Landing page and office dashboard	the address your department gives you, for example <code>https://vuka.example.gov.za</code>	Everyone with an account
Phone reporting	the same address followed by <code>/m</code>	Entity reporters
Citizen view	the same address followed by <code>/public</code>	Anyone, no account
Audit trail	the same address followed by <code>/logs</code>	Anyone signed in (a reporter sees their own entity only)

There is no sign-up. DSAC issues each reporter account for one named entity. If you report for an entity and have no account, ask your DSAC administrator. See [Getting in](#).

You land on your own screen. Vuka knows your role and, for a reporter, your entity, from your account. A reporter never chooses an entity; the entity name is already at the top of the page.

Role	Opens on	Menu on the left
Entity reporter	My reporting	My reporting, Documents, Workspaces, Tasks, Citizen View
DSAC reviewer	Today	Today, Review queue, Risk & Alerts, Analytics & Insights, Documents, Workspaces, Tasks
DSAC executive	Portfolio	Portfolio, Entities, Analytics & Insights, Citizen View
DSAC administrator	Administration	Administration, Workspaces, Tasks, Citizen View

Across the top of every signed-in page are a search box, the **language** picker, a notifications bell, and your name and role with the sign-out button. The arrow at the top of the menu collapses it to icons.

Down the right edge of every page, signed in or not, is the **Ask Karabo** tab. See [Asking Karabo](#).

About the screenshots

The screenshots were taken on a demonstration copy of Vuka loaded with the 28 real DSAC entities and their published allocations. Quarterly figures, reviews, comments, tasks and people's names in them are illustrative.

That copy runs with a development sign-in, so three things in the screenshots will not appear on a real deployment:

- the orange strip across the top that reads "Development sign in is enabled",
- the **Demonstration accounts** panel at the foot of the sign-in page, and
- the employee single sign-on button signing straight in as the administrator. A real deployment would federate it to the Department's directory, which is not wired in this build.

Karabo's answers in the screenshots are real answers from the connected model, given to the questions shown. Asked again, it may word them differently; the figures and sources stay the same.

Red numbered boxes were added to the screenshots to show where to click. They are not part of the screen.

Getting in

In short: Open the Vuka address, pick your language, and sign in with the account DSAC gave you. There is no sign-up. Karabo, the assistant, is on the right edge of every page.

Who this is for: anyone opening Vuka for the first time.

What you will do: find your way in from the landing page, choose your language, and sign in.

1. The landing page

Open the Vuka address. Before you sign in you see the Department's landing page.

1. **Login as employee.** For DSAC staff, by single sign-on, straight to the dashboard.
2. **Sign in.** For reporting entities, who sign in with the account DSAC issued them.
3. **Language.** English, Afrikaans, isiZulu, isiXhosa or Sesotho. **Citizen View** beside it opens the public pages, no account needed.
4. **Ask Karabo,** the assistant (see step 4).

In this demonstration build **Login as employee** signs in with the administrator role. Federated sign-in through the Department's Microsoft Entra ID is not wired, and the note under the two cards says so.

2. Choose your language

Pick your language from the picker at the top of any page, before or after you sign in. The whole dashboard follows it: menus, buttons, headings, messages and dialogs.

Vuka remembers your choice on that computer. Numbers, dates and rands are written the South African way in every language.

Three things to know:

- The four translations were drafted by machine and have **not yet been reviewed** by first-language speakers. Where a word matters, the English is the reference.
- A few error messages, and the descriptions of changes waiting to be sent while you are offline, still appear in English whatever language you choose.
- Terms with a legal or audit meaning (**unverifiable, statutory, no result reported**) are kept distinct in every language, because the difference between them is the point.

3. Sign in

Click **Sign in** on the landing page.

Demonstration accounts

© 2026 Department of Sport, Arts and Culture. Republic of South Africa. Privacy | Terms | Help

1. Enter the email address on your account and your password.
2. Click **Sign in**.
3. **Forgot password?** opens the reset page.

DSAC staff signing in by single sign-on use the landing page's **Login as employee** card; the sign-in page itself has only the email and password form.

The notice under the form says how your personal information (your email address and password) is handled under the Protection of Personal Information Act. In the demonstration build a **Demonstration accounts** panel sits below it, with one button per role; scroll the form to reach it.

Forgot password asks for your email address. In this build the page is a design: it is not connected and **no email is sent**, and the page says so. It answers in the same words whether or not the address has an account, so the page cannot be used to find out who has one.

4. Ask Karabo

The **Ask Karabo** tab on the right edge of every page opens **Karabo**, the assistant. Ask it a question in ordinary words and it answers from Vuka's records, with the source under each answer. Before you sign in it can only tell you what the Department has published.

See [Asking Karabo](#) for what it can answer and for whom.

5. An entity that has no account yet

There is no sign-up. A reporter's account is tied to one entity, and that tie is what stops one entity reading another's reporting, so accounts are issued by a DSAC administrator (see [Setting up](#)).

The **Entity Registration** page, at the address followed by `/register`, is where an organisation would apply to be onboarded. It collects organisation details, contact details and supporting documents over four steps, and it creates no account. **In this build it is a design and nothing is submitted.** The notice at the top of the form says so.

Asking Karabo

In short: Karabo is Vuka's assistant. Ask it a question in ordinary words, in any of the five languages, and it answers from Vuka's own records. Under every answer it lists where the figure came from. It only ever tells you what your own account is allowed to see.

1. Open Karabo

Click the **Ask Karabo** tab on the right edge of any page. It is there before you sign in, on the landing page, and on every screen after. On **Portfolio** and **Analytics & Insights** there is also an **Ask Karabo** button at the top (1).

Karabo opens beside the page, and the page moves over to make room, so nothing is covered. The opening message says what it can answer for you. Four suggested questions sit above the box:

- Which entities are late this quarter?
- What was Iziko allocated this year?
- Why is Robben Island scored critical?
- Show me figures with no evidence attached

Click one, or type your own question in the box at the bottom and press enter. Close Karabo with the **X** at its top right.

2. Read the answer

Every answer has two parts:

1. **The answer**, in a sentence or a short list.
2. **Where this came from**, underneath: the records Vuka actually read to produce it, for example *Estimates of National Expenditure 2026, Vote 37, Table 37.3*. These are collected by Vuka from what it looked up, not written by the model, so a source cannot be made up.

Karabo
Ask about any body the Department funds

I am Karabo. Ask me about any body the Department funds, in ordinary words, and I will answer with the figure and where it came from.

I answer from what the Department has published: allocations and how many targets each entity achieved. Under each answer I show where the figure came from. Staff who sign in can also ask about deadlines, risk and evidence.

What was Iziko allocated this year?

Iziko Museums of South Africa was allocated R110.6 million for 2026/27, according to the Estimates of National Expenditure 2026, Vote 37, Table 37.3.

WHERE THIS CAME FROM

- Iziko Museums of South Africa, allocation 2026/27: Estimates of National Expenditure 2026, Vote 37, Table 37.3
- Iziko Museums of South Africa, target outcomes: Figures confirmed in Vuka, published by DSAC

Ask about an entity, a figure or a deadline...

Karabo answers only from Vuka's records, with your own access, and can still be wrong. Check the source under each answer.

If the record does not hold the answer, Karabo says so. It does not guess. Asked *Why is Robben Island scored critical?*, it corrects the question: Robben Island is scored 45, which is medium, not critical. It then lists the five signals behind the score and what each one adds.

Transparent. Accountable.
Impactful.

2024/25	R2.129bn
2025/26	R2.302bn
2026/27	R2.258bn

Targets achieved, audited

A year with no published count draws no bar.

Year	Targets achieved, audited
2023/24	85%
2024/25	84%
2025/26	not audited
2026/27	in year

The two charts are not the same population. Each year's rate covers whichever entities published counts that year, so read them as two facts about years, never as one rate. The like-for-like

Karabo
Ask about any body the Department funds

why is Robben Island scored critical?

The record does not show Robben Island scored "critical." Robben Island Museum is scored 45, band medium for Q1 2026/27, according to Vuka risk engine, stored signals for Q1 2026/27.

Why: the largest signals are (source as above)

- Submission lateness: filed 70 days after a statutory PFMA deadline (a breach of the Act), contribution 30.
- Prior audit finding: audit outstanding; financial statements missed the statutory date and the audit was not completed, contribution 15.
- Spend-delivery divergence: delivery (0%) keeping pace with spend (0%), contribution 0.
- Revision churn: no targets restated mid-year, contribution 0.
- Evidence gap: no targets registered for this year, contribution 0.

The score is the sum of those stored signal contributions, per the same source.

WHERE THIS CAME FROM

- Robben Island Museum, risk score: Vuka risk engine, stored signals, Q1 2026/27

Ask about an entity, a figure or a deadline...

Karabo answers only from Vuka's records, with your own access, and can still be wrong. Check the source under each answer.

You can ask a follow-up in the same conversation, for example *How is Iziko doing this quarter?* straight after another question.

Karabo can still be wrong. That is why the source is under every answer: check it before you quote a figure.

3. What Karabo can see depends on who you are

Karabo answers with exactly your own access, the same as the screens.

You are	Karabo can tell you about
Not signed in	Only what the Department has published: each published entity's allocation and how many of its targets it achieved
An entity reporter	Your own entity only
DSAC reviewer, executive or administrator	Every entity, as your screens already show it

A member of the public who asks about risk is told that risk scores are for Department and entity staff who sign in, and is given the published figures instead.

Karabo

Ask about any body the Department funds

allocated R110.6 million for 2026/27, according to the Estimates of National Expenditure 2026, Vote 37, Table 37.3.

WHERE THIS CAME FROM

- Iziko Museums of South Africa, allocation 2026/27: Estimates of National Expenditure 2026, Vote 37, Table 37.3
- Iziko Museums of South Africa, target outcomes: Figures confirmed in Vuka, published by DSAC

Why is Robben Island scored critical?

The published record here does not say why Robben Island Museum is scored critical. Robben Island Museum was allocated R96.8 million, according to the Estimates of National Expenditure 2026, Vote 37, Table 37.3; the published targets show zero in every category (figures confirmed in Vuka by the entity and published by DSAC). Detailed risk scores and the reasons for a "critical" score are available to Department and entity staff who sign in.

WHERE THIS CAME FROM

- Robben Island Museum, allocation 2026/27: Estimates of National Expenditure 2026, Vote 37, Table 37.3
- Robben Island Museum, target outcomes: Figures confirmed in Vuka, published by DSAC

Ask about an entity, a figure or a deadline...

Karabo answers only from Vuka's records, with your own access, and can still be wrong. Check the source under each answer.

A reporter who asks about another entity is told there is no such entity they can access. Nothing about the other entity is revealed.

Capture on a phone

The Department holds it. You will be notified if any figure is returned to you. Evidence may still be attached.

Karabo

Ask about any body the Department funds

I am Karabo. Ask me about any body the Department funds, in ordinary words, and I will answer with the figure and where it came from.

I answer from Vuka's own records, with exactly what your account can see. Under each answer I show where the figure came from. If the record does not show something, I will say so rather than guess.

What did Boxing South Africa report this quarter?

The record does not show an entity named "Boxing South Africa" that you can access, so there is no reporting available for it this quarter. Please check the entity name or short name and try again.

WHERE THIS CAME FROM

- Q2 2026/27, deadline and submissions: Vuka reporting periods and submissions, due 2026-10-09

Ask about an entity, a figure or a deadline...

Karabo answers only from Vuka's records, with your own access, and can still be wrong. Check the source under each answer.

4. Ask in your own language

Type your question in English, Afrikaans, isiZulu, isiXhosa or Sesotho, and Karabo answers in the same language. Here a reporter asks in isiZulu whether any of their figures have no evidence, and the answer comes back in isiZulu with its source.

The screenshot displays the Vuka reporting interface. On the left is a dark sidebar with navigation options: 'My reporting', 'Documents', 'Workspaces', 'Tasks' (with a red badge showing '3'), and 'Citizen View'. The main content area is titled 'Iziko Museums of South Africa' and shows a report for 'Q1 2026/27' by 'L. Dlamini' dated '19 Sept 2026 04:06'. It indicates '1 figure disputed' and provides a comment: 'HER-1.1 The register extract lists three exhibitions opening in Q1, but 2 is reported. Please check which figure is right. L. Dlamini, 19 Sept 2026 04:06'. Below this, it states 'Only these figures were reopened. Everything else stays as filed, with the original confirmation and its author on the record. Reply against a figure on the next screen and the reviewer sees it within seconds.' and includes a button 'Answer the disputed figure'. A section for 'Q2 2026/27' shows a date range from '01 Jul 2026 to 30 Sept 2026' and a deadline of 'Due 09 Oct 2026' with '20 days left'. It notes '20 of 20 targets reported' at '100%' and includes buttons for 'Open this period', 'Upload completed file', 'Download template', and 'Capture on a phone'. A note at the bottom states 'The Department holds it. You will be notified if any figure is returned to you. Evidence may still be attached.' On the right, a 'Karabo' (answer) panel shows a question in isiZulu: 'Ngabe kukhona izibalo zethu ezingenabo ubufakazi?' (Do we have any figures without evidence?). The answer explains that the record does not show an entity named 'Boxing South Africa' and provides a source: 'Yebho — Iziko Museums of South Africa ibikezele izibalo eziyi-20 ku-Q2 2026/27; ezingama-19 zazo azinabo ubufakazi, ku-Q2 2026/27. Ngabe ufuna uhlu lwezinkomba ezingenabo ubufakazi?'. It also includes a note: 'WHERE THIS CAME FROM • Figures without evidence: Vuka submissions, Q2 2026/27'. At the bottom of the Karabo panel, it says 'Karabo answers only from Vuka's records, with your own access, and can still be wrong. Check the source under each answer.'

5. When Karabo cannot answer

Karabo says plainly what went wrong, and nothing is ever changed by asking:

- **Not connected.** Where no model is set up for this deployment, the opening message says so and the question box is switched off.
- **Too many questions.** Questions from the public are limited to a few a minute and a few dozen a day from one address. Wait a minute and ask again.
- **Offline.** Karabo needs a connection. Your question is not sent, and it is not kept for later.
- **Too long or not answerable.** Keep a question under 1,000 characters and about an entity, a figure or a deadline.

Karabo reads records; it cannot confirm, approve, return or change anything.

Setting up: the administrator

In short: The administrator sets when each quarter is due, gives each entity one reporter account, links it to Microsoft 365, and decides which entities the public can see. They never touch a reported figure.

Who this is for: the DSAC administrator who decides who reports, by when, and what the public sees.

What you will do: set a quarter's due date, issue an entity its reporter account, connect an entity's documents to Microsoft 365, publish an entity to the citizen view, and register a new entity.

Nothing on the Administration screen touches a reported figure. The administrator also cannot approve a submission: whoever decides what the public sees is not the person who approves the figures it will see.

1. Open Administration

Sign in. You land on **Administration**.

Submission deadlines

For a Schedule 3A entity, Treasury Regulation 30.2.1 sets no day count for quarterly performance reporting, so the date is the Department instruction and is set here, for every entity at once. Reporters are warned when they sign in within thirty days of it, and reminded at thirty days, fifteen days and on the last day.

QUARTER	PERIOD	DUE	BASIS	CHANGE
Q1 2026/27	01 Apr 2026 to 30 Jun 2026	30 Jul 2026 51 days late	Departmental instruction	Passed, fixed
Q2 2026/27	01 Jul 2026 to 30 Sept 2026	09 Oct 2026 20 days left	Departmental instruction	2026/10/09 Set
Q3 2026/27	01 Oct 2026 to 31 Dec 2026	30 Jan 2027 133 days left	Departmental instruction	2027/01/30 Set
Q4 2026/27	01 Jan 2027 to 31 Mar 2027	30 Apr 2027 223 days left	Departmental instruction	2027/04/30 Set

Entities and their reporters

Entities cannot sign up. Each reporter account is issued here for one named entity, and the person it is issued to can only sign in. Publication is a departmental decision.

The three tiles at the top count how many entities are **published** to the citizen view, how many have **no reporter account** yet, and how many have **no targets registered**.

2. Set a quarter's due date

For a Schedule 3A entity, Treasury Regulation 30.2.1 sets no day count for quarterly performance reporting, so the due date is the Department's instruction. It is set here, once per quarter, for every entity.

1. Find the quarter in **Submission deadlines** and pick the new date in the **Change** column (1).
2. Click **Set** (2).

Submission deadlines

For a Schedule 3A entity, Treasury Regulation 30.2.1 sets no day count for quarterly performance reporting, so the date is the Department instruction and is set here, for every entity at once. Reporters are warned when they sign in within thirty days of it, and reminded at thirty days, fifteen days and on the last day.

QUARTER	PERIOD	DUE	BASIS	CHANGE
Q1 2026/27	01 Apr 2026 to 30 Jun 2026	30 Jul 2026 51 days late	Departmental instruction	Passed, fixed
Q2 2026/27	01 Jul 2026 to 30 Sept 2026	30 Oct 2026 41 days left	Departmental instruction	2026/10/09 Set
Q3 2026/27	01 Oct 2026 to 31 Dec 2026	30 Jan 2027 133 days left	Departmental instruction	2027/01/30 Set
Q4 2026/27	01 Jan 2027 to 31 Mar 2027	30 Apr 2027 223 days left	Departmental instruction	2027/04/30 Set

Entities and their reporters

Entities cannot sign up. Each reporter account is issued here for one named entity, and the person it is issued to can only sign in. Publication is a departmental decision.

The row updates at once, with the new date and the days left.

Q2 2026/27	01 Jul 2026 to 30 Sept 2026	09 Oct 2026 20 days left	Departmental instruction	2026/10/09 Set
------------	-----------------------------	-----------------------------	--------------------------	---

Every reporter's countdown, the lateness measure in the risk score and the reminders all read this one date. Reminders go by email at 30 days, 15 days and on the last day. Where an entity's workspace has a Teams channel set (step 4), the same countdown is posted there, hourly on the last two days.

Bringing a date forward warns the reporters. A reporter whose quarter now falls due within 30 days, and who has not submitted, sees a warning the next time they sign in. See [J1, step 1](#).

Vuka refuses four kinds of change, and says why:

- A deadline that has **passed** cannot be moved. The quarter shows **Passed, fixed**, because lateness was already measured against it.
- A new date cannot be in the past.
- It cannot fall before the quarter ends.

- It cannot be later than a statutory deadline, where one applies.

Every change is written to the audit log with your name.

3. Issue a reporter account

Scroll to **Entities and their reporters**. Each row shows the entity, its sector, how many targets are registered for the year, its reporters, whether it is published, and its Microsoft 365 link.

Entities and their reporters

Entities cannot sign up. Each reporter account is issued here for one named entity, and the person it is issued to can only sign in. Publication is a departmental decision: every entity starts unpublished, and every change is written to the audit log with your name.

Reporter account for Artscape

The account can report for Artscape and nothing else. The person signs in; they cannot sign up, and they cannot choose a different entity.

Full name

Thabo Nkosi

Work email

thabo.nkosi@artscape.example

Issue an account Cancel

The account can report for that entity and nothing else. The person can only sign in; they cannot sign up or choose a different entity.

- Where the deployment is connected to its sign-in service, Vuka shows a **set-password link**. Send it to the person. The password never passes through DSAC.
- Where it is not, Vuka says **Recorded, no credential issued**. The person is recorded so they still receive the entity's reminders, and the row says **(no credential)**, as below.

Artscape

4. Connect an entity to Microsoft 365

Click **Configure** in the **Microsoft 365** column (2 in the row above).

The dialog has three parts:

- **Bind to a SharePoint library.** Enter the **Site hostname** and **Site path** (or tick the box to give a drive id instead) and a **Folder path**, then click **Bind**. From then on, each document the entity uploads to Vuka is mirrored to that library, and each document's row in **Documents** shows whether its copy has synced.
- **Teams deadline reminders.** Paste the channel's workflow **Webhook URL** and click **Save**. The deadline countdown is then posted to that channel. Vuka never shows a saved webhook address back, because whoever holds it can post to the channel.
- **Sync.** Picks up, straight away, files saved in the bound folder from Word, Excel or Teams. Vuka also checks the folder by itself every five minutes. Each file arrives as a new version, with the name of the person who saved it.

Documents are always held in Vuka, with their versions and receipts, whether or not a library is bound, and nothing about the evidence behind a figure depends on the mirror.

In the demonstration copy no Microsoft tenant is connected, so the dialog says **This tenant is not configured** and a bind fails until the Department sets up its Microsoft Graph connection.

5. Publish an entity to the citizen view

Nothing reaches the public until the Department publishes the entity. Every entity starts unpublished.

1. Click **Publish** (3 in the row above) on the entity's row.
2. The **Citizen view** column changes to **published** (1), and the button becomes **Unpublish**.

Department: Sport, Arts and Culture
REPUBLIC OF SOUTH AFRICA

Better reporting. Stronger institutions. A brighter South Africa.

Click **Citizen View** at the top of the page to see what the public now sees. See [J5. The citizen view](#).

6. Register a new entity

1. Click **Register an entity** at the top right.
2. Enter the name, a short name, the sector, the PFMA schedule and, if you have them, a contact person and email. Deadline reminders go to the contact email as well as to the reporters.
3. Click **Register**. Then issue its reporter account as in step 3.

The screenshot shows the Vuka web application interface. A modal titled "Register an entity" is open in the center. The modal contains the following fields and options:

- Name:** A text input field.
- Short name:** A text input field.
- Sector:** A dropdown menu with the option "Choose a sector".
- PFMA schedule:** A dropdown menu with the option "Schedule 3A (national public entity)".
- Contact person (optional):** A text input field.
- Contact email (optional):** A text input field.

Below the input fields, there are two buttons: "Register" and "Cancel".

The background of the application shows a sidebar with "Administration", "Workspaces", "Tasks" (with a red notification badge), and "Citizen View". The main content area displays a list of entities, including one with "6" and another with "16". A top navigation bar includes a search bar, language settings (English), and a user profile for "Thandi Mthembu".

The new entity starts unpublished, with no targets and no reporter. It appears in the review queue at once, with nothing filed.

J1. Reporting from your desk

In short: Download the template, fill in your figures, upload it, attach the document behind each figure, confirm, and submit. If the Department doubts a figure, it comes back to you with a reason.

Who this is for: the reporting officer at an entity who keeps the quarter's figures in a spreadsheet and reports from a computer.

What you will do: download the pre-filled template, fill in your actual figures, upload it, check what Vuka read, attach evidence, confirm, and submit.

Before you start: you need a reporter account from DSAC. Have your figures and your supporting documents (attendance registers, signed reports, photographs, invoices) to hand.

Nothing is filed until you confirm it. Uploading only reads the file.

1. Sign in and find your quarter

Sign in with your email address and password (see [Getting in](#)).

If a quarter is due within 30 days, or already late, Vuka warns you first. The warning says which quarter, when it is due, and that reminders go to your inbox at thirty days, fifteen days and on the last day. Click **Report Q2 2026/27 now** to go straight to it, or **Later** to close it. It appears once each time you sign in, and again only if the dates change.

You land on **My reporting**.

1. Your entity's name. It comes from your account, so there is nothing to choose.

2. The open quarter's due date and how many days are left. **Not a statutory date** means the Department set it as an instruction.
3. **Download template**, for step 2.
4. **Upload completed file**, for step 3.

The line under the quarter says what is waiting on you and what to do next. **Prior periods** lists earlier quarters with how late each was filed; those rows are what the lateness part of your risk score is worked out from.

If you would rather type figures straight into Vuka, click **Enter figures** and go to step 4. **Capture on a phone** opens the phone pages; see [J2](#).

2. Download the template and fill it in

1. Click **Download template**. You get an Excel file already filled with your entity's registered targets, their indicator codes, their annual targets and the quarter.
2. Type your actual figures into the actuals column. Do not rename sheets, retype indicator names or move rows: Vuka matches each row by its indicator code.
3. Save the file.

Always use the template downloaded for **this** quarter. A blank spreadsheet with retyped indicator names is the most common reason an upload cannot be matched.

3. Upload the completed file

1. Click **Upload completed file**.
2. Click **Choose file** and pick your saved template (1).
3. Click **Upload and parse** (2).

Vuka reads the file and tells you how many rows it read and how many matched a registered target (3).

A row whose indicator code matches no registered target is **held aside**, not thrown away. You will see it at the bottom of the next screen.

Click **Review what was read**.

4. Check what Vuka read

Each target has its own row.

The screenshot shows the Vuka reporting interface for Iziko Museums of South Africa. The left sidebar contains navigation links: My reporting, Documents, Workspaces, Tasks (with a red notification badge), and Citizen View. The main content area displays a warning message (1) and a table of targets (2). The table has columns for Quarter Target, Annual Target, and Variance. The first row shows a target of 3 for the quarter and 12 for the annual, with a variance of 0 (0%). The 'Reported figure' is 3. A note for the Department is optional. A red notification badge (3) is next to the 'attach' button. The bottom of the interface shows a summary of confirmed targets (0 of 20 confirmed) and a 'Confirm 19 ready' button.

Development sign in is enabled. Tokens are not verified and any role can be assumed. Never run a deployed environment this way.

← Iziko Museums of South Africa

Q2 2026/27 0 of 20 confirmed, 0 with evidence [Attach evidence files](#)

Reviewing parsed file: Iziko_Q2-2026-27_completed.xlsx

1 ⚠ Nothing here is saved as a reported result yet. Confirming writes these figures in your name, and they cannot be edited afterwards. A correction happens by the Department returning the submission.

2 HER-1.1 **Number of exhibitions mounted**

	QUARTER TARGET	ANNUAL TARGET	VARIANCE
3 from Quarterly Report!F11 ↗	3	12	0 (0%)

Reported figure (exhibitions and collection items) 3

Note for the Department (optional)

☐ No result this quarter, because

⚠ No evidence attached. This figure will show to the Department as **unverifiable**, which is different from **unverified**. [attach](#) 3

[Confirm 3](#)

0 of 20 confirmed [Confirm 19 ready](#) [Submit to the Department](#)

Figures in a spreadsheet? Copy the column and paste it into the first box: it fills the rows below in order. Or copy two columns, code and figure, to match by code.

Every target needs either a confirmed result or a recorded reason for having none before the period can be submitted. One row still needs a figure, a reason for a shortfall past twenty percent, or a reason for having no result. **Go to the first one**

1. The warning: nothing on this page is saved as a reported result until you confirm it.
2. The figure Vuka read, the cell it came from (for example **from Quarterly Report!F11**), the quarter target, the annual target and the variance. Click the cell reference to open the file at that value.
3. **attach**, for step 5.

Most rows need nothing from you. Vuka stops you on three kinds of row, and each one says what it needs. In the demonstration template there is exactly one such row, so the screen can be walked in a minute; a real file usually has a few.

No value found. The file had nothing for this indicator, and the row says **Not parsed**. Its **Confirm** button stays off.

HER-1.3 **Number of public education programmes delivered**

⚠ **Not parsed.** No value for this indicator was found in the uploaded file. Enter it here, or record that there is no result this quarter.

Reported figure (exhibitions and collection items) Note for the Department (optional)

☐ No result this quarter, because

⚠ No evidence attached. This figure will show to the Department as **unverifiable**, which is different from unverified. **attach**

Confirm

Either type the figure into **Reported figure**, or tick **No result this quarter, because** and say why. With no result ticked, the button reads **Record no result**.

HER-1.3 **Number of public education programmes delivered**

⚠ **Not parsed.** No value for this indicator was found in the uploaded file. Enter it here, or record that there is no result this quarter.

Reported figure (exhibitions and collection items) Note for the Department (optional)

☒ No result this quarter, because

⚠ No evidence attached. This figure will show to the Department as **unverifiable**, which is different from unverified. **attach**

Record no result

A shortfall of more than 20 percent with no reason. If the figure you type is more than 20 percent under the quarter target, the note becomes **Reason for the variance (required)** and **Confirm** stays off until you write one. Here 2 was typed against a quarter target of 6.

HER-1.3 **Number of public education programmes delivered**

⚠ **Not parsed.** No value for this indicator was found in the uploaded file. Enter it here, or record that there is no result this quarter.

Reported figure (exhibitions and collection items) Reason for the variance (required)

A variance past 20 percent needs a reason before you can confirm. Giving it now avoids the submission being returned, which costs about two weeks.

☐ No result this quarter, because

⚠ No evidence attached. This figure will show to the Department as **unverifiable**, which is different from unverified. **attach**

Confirm 2

Give the reason now. A shortfall without one is the most common reason the Department returns a submission, and a return costs about two weeks.

HER-1.3

Number of public education programmes delivered

⚠

Not parsed. No value for this indicator was found in the uploaded file. Enter it here, or record that there is no result this quarter.

Reported figure (exhibitions and collection items)

Note for the Department (optional)

2

Two programmes moved to October when the education centre closed for roof repairs from 4 August.

☐ No result this quarter, because

⚠

No evidence attached. This figure will show to the Department as **unverifiable**, which is different from unverified.

attach

✓ Confirm 2

A value that is not a number. The cell held text such as "approx 8". The row says **Not a number** and shows the text. Type the number into **Reported figure**, or record no result with a reason, as above.

5. Attach evidence

Evidence is what lets the Department trace a figure back to a source document, which is the Auditor-General's reliability test.

1. Click **attach** on the row.
2. Click **Choose file** and pick the document (1).
3. Tick which part of the reliability test it satisfies (2): **Validity** (it happened and relates to your entity), **Accuracy** (amounts and quantities are right), **Completeness** (everything that should have been recorded was).
4. Click **Attach** (3).

The document now shows under the figure with a green shield, and the parts of the test it satisfies.

HER-1.3
Number of public education programmes delivered

⚠️ **Not parsed.** No value for this indicator was found in the uploaded file. Enter it here, or record that there is no result this quarter.

Reported figure (exhibitions and collection items)

2

Note for the Department (optional)

Two programmes moved to October when the education centre closed for roof repairs from 4 August.

☐ No result this quarter, because

✓ Attendance-register-Q2.pdf
 ✓ Attendance-register-Q2.pdf

Traceable to source. Satisfies completeness, validity. add

✓ Confirm 2

To attach several files at once, use **Attach evidence files** at the top of the page.

You can attach evidence after you submit, too. Withholding it is worse than attaching it late. A figure with nothing attached shows to the Department as **unverifiable**.

6. Confirm your figures

Confirm one row at a time with its **Confirm** button, or every row that is ready at once with the button at the bottom of the page (1). That button reads **Confirm all *n*** while every outstanding row is ready, and **Confirm *n* ready** while some still need a figure or a reason.

0 of 20 confirmed

1

✓ Confirm all 20

Submit to the Department

Figures in a spreadsheet? Copy the column and paste it into the first box: it fills the rows below in order. Or copy two columns, code and figure, to match by code.

Every target needs either a confirmed result or a recorded reason for having none before the period can be submitted.

Only one of the two buttons at the bottom is the next step at any moment, and it is the highlighted one. While figures are outstanding, that is the bulk confirm. Once nothing is outstanding, it becomes **Submit to the Department**.

Vuka shows every figure you are about to confirm, with the cell it came from. A figure you typed in yourself says **entered by hand**.

The screenshot shows the Vuka interface with a modal titled "Confirm 20 figures". The modal contains a list of 20 items, each with a code and a source. The items are:

- HER-1.1 3 from Quarterly Report!F11
- HER-1.2 5 from Quarterly Report!F12
- HER-1.3 2 entered by hand
- HER-1.4 8 from Quarterly Report!F14
- HER-1.5 10 from Quarterly Report!F15
- HER-2.1 11 from Quarterly Report!F16
- HER-2.2 12 from Quarterly Report!F17
- HER-2.3 14 from Quarterly Report!F18
- HER-2.4 3 from Quarterly Report!F19
- HER-2.5 5 from Quarterly Report!F20
- HER-3.1 6 from Quarterly Report!F21
- HER-3.2 8 from Quarterly Report!F22
- HER-3.3 10 from Quarterly Report!F23
- HER-3.4 11 from Quarterly Report!F24
- HER-3.5 12 from Quarterly Report!F25
- HER-4.1 14 from Quarterly Report!F26
- HER-4.2 3 from Quarterly Report!F27
- HER-4.3 5 from Quarterly Report!F28

The background shows the Vuka interface with a sidebar on the left containing "My reporting", "Documents", "Workspaces", "Tasks", and "Citizen View". The main area displays a table with columns for "Reported figure and collection it" and "Collection it".

Read the first paragraph before you click **Confirm**. Confirming writes these figures as your entity's reported results, **in your name**, and **they cannot be edited afterwards**. If one is wrong, the Department returns it and you confirm a corrected figure. The original stays on the record.

7. Submit to the Department

When every target has a confirmed figure or a recorded reason for having none, **Submit to the Department** (1) turns on.

20 targets
20 with a confirmed result
0 recorded as having no result, with reasons
1 with evidence attached
19 with no evidence, which the Department will see as unverifiable

Submitting today, 20 days before the due date.

After this the Department holds it. You will be notified if any figure is returned to you.

Not yet **Submit**

Click **Submit**.

8. After you submit

Your home page now says **The Department holds it**. The Department is looking at it, and you will be told if any figure comes back to you. You can still attach evidence.

The screenshot shows the Vuka interface for the 'Iziko Museums of South Africa' entity. The left sidebar contains navigation links: My reporting, Documents, Workspaces, Tasks (with a red notification badge), and Citizen View. The main content area displays the 'Q2 2026/27' reporting period (01 Jul 2026 to 30 Sept 2026) with a due date of 09 Oct 2026 (20 days left). A progress bar indicates '20 of 20 targets reported' at 100%. A message states: 'Not a statutory date. A date the Department set. Enforceable as an instruction rather than as law.' Below this are buttons for 'Open this period', 'Upload completed file', 'Download template', and 'Capture on a phone'. A notification states: 'The Department holds it. You will be notified if any figure is returned to you. Evidence may still be attached.' The 'Prior periods' section shows 'Q1 2026/27' as 'Submitted' with '20 of 20 reported' and a note 'submitted 11 days late'. At the bottom, three summary boxes show: '20 Targets registered for the year', '20 Figures confirmed this period', and '2 Evidence documents attached'.

If a figure is returned to you

A reviewer who disputes a figure returns it with a comment against that figure. Only the disputed figures are reopened. Everything else stays as you filed it.

A returned quarter sits at the top of your home page, whichever quarter it is: who returned it, when, and each disputed figure with the reviewer's comment in their words. It appears without reloading the page. Click **Answer the disputed figure (1)**.

Reporting as N. Mabaso. The entity is taken from your signed token, which is why there is nothing here to choose.

Q1 2026/27 was returned to you by L. Dlamini 19 Sept 2026 04:06

1 figure disputed. See the comment against each target.

HER-1.1 The register extract lists three exhibitions opening in Q1, but 2 is reported. Please check which figure is right. L. Dlamini, 19 Sept 2026 04:06

Only these figures were reopened. Everything else stays as filed, with the original confirmation and its author on the record. Reply against a figure on the next screen and the reviewer sees it within seconds.

Answer the disputed figure

Q2 2026/27 Due 09 Oct 2026
01 Jul 2026 to 30 Sept 2026 20 days left

Not a statutory date. A date the Department set. Enforceable as an instruction rather than as law.

20 of 20 targets reported 100%

Open this period Upload completed file Download template Capture on a phone

The Department holds it. You will be notified if any figure is returned to you. Evidence may still be attached.

Prior periods The lateness signal in your risk score is computed from these rows and nothing else.

Q1 2026/27 Returned 20 of 20 reported submitted 11 days late

The disputed figure opens with the Department's comment above it. Correct the figure or explain it in the note, attach evidence if you have it, confirm it, and submit again. **Show all 20 figures** shows the rest of the filing if you need it.

HER-1.1 **Number of exhibitions mounted** (REOPENED FOR CORRECTION)

The Department disputed this figure. The register extract lists three exhibitions opening in Q1, but 2 is reported. Please check which figure is right.

	QUARTER TARGET	ANNUAL TARGET	VARIANCE
2	3	12	-1 (-33%)

Entered by hand, no source cell

Reported figure (exhibitions and collection items) Note for the Department (optional)

2 Delivery deferred to the following quarter. (Illustrative explanation.)

No result this quarter because

19 of 20 confirmed Confirm 1 ready Submit to the Department

Figures in a spreadsheet? Copy the column and paste it into the first box: it fills the rows below in order. Or copy two columns, code and figure, to match by code.

Every target needs either a confirmed result or a recorded reason for having none before the period can be submitted.

J2. Reporting from a phone

In short: On a phone, Vuka asks one question per page. Each answer is saved as you go, even with no signal. Submit at the end.

Who this is for: the person at a small entity who reports on a phone, often on mobile data, and is not a finance specialist.

What you will do: sign in, answer one indicator at a time, and submit.

The phone pages are deliberately plain. They load quickly on a weak signal and use very little data. Your answers are saved as you go, so a dropped connection never loses your work.

1. Open the link and sign in

Open the link DSAC sent you (it ends in `/m`). Enter your email address and password, and tap **Sign in**.

A screenshot of the Vuka mobile application sign-in screen. At the top, the word "Vuka" is displayed in bold, followed by the text "Quarterly reporting for the Department of Sport, Arts and Culture." Below this, there is a label "Email address" above a yellow input field containing the text "thabo@artscape.example". Underneath the email field is a label "Password" above a yellow input field with masked characters ".....". A dark green button with the text "Sign in" is positioned below the password field. At the bottom of the screen, a small line of text reads: "If you do not have an account, the Department issues one for your entity."

If you do not have an account, DSAC issues one for your entity. You cannot sign up yourself.

A sign-in lasts about an hour. If it runs out part way through, sign in again and Vuka takes you back to the question you were on.

2. Start the quarter

Your reporting shows the open quarter and when it is due. Tap **Start Q2 2026/27** (1). Once started, the same card lets you continue where you left off.

Comments shows anything the Department has asked you. **Documents** is where you upload plans, reports and evidence (step 6).

3. Answer one indicator at a time

Each indicator has its own page. The bar at the top shows how far through you are.

Indicator 1 of 12, Q2 2026/27

ART-1.1

Number of productions staged

1 Target for this quarter
3.00 productions and performances

How many did you actually deliver?

2 Enter a number only.

☐ There is no result this quarter

How much has been spent on this so far?

In rand. A best estimate is fine.

If you did not reach the target, or have no result, why not?

One or two sentences. Needed when you are more than 20 percent under the target. Leave blank if the target was met.

3 **Save and next**

Your answers are saved as you go. If you lose signal, keep entering each answer is kept on this phone and sent when...

1. What the Department expected this quarter.
2. **How many did you actually deliver?** Enter a number only. If there is nothing to report, tick **There is no result this quarter** instead.
3. Tap **Save and next**.

Two more fields are on each page:

- **How much has been spent on this so far?** In rand. A best estimate is fine.
- **If you did not reach the target, or have no result, why not?** One or two sentences.

4. If you are well under the target, say why

If your figure is more than 20 percent under the quarter target and you have not said why, Vuka keeps you on that page and asks (1).

Indicator 3 of 12, Q2 2026/27

ART-1.3

Number of artists provided with work opportunities

Target for this quarter

6.00 productions and performances

1 ART-1.3 is more than 20 percent under its quarter target of 6. Say why, so the Department does not have to send it back to ask.

How many did you actually deliver?

Enter a number only.

2

☐ There is no result this quarter

How much has been spent on this so far?

In rand. A best estimate is fine.

If you did not reach the target, or have no result, why not?

One or two sentences. Needed when you are more than 20 percent under the target. Leave blank if the target was met.

Write a sentence in the **why not?** box and tap **Save and next** again. Saying why now means the Department does not have to send it back to ask.

Indicator 3 of 12, Q2 2026/27

ART-1.3

Number of artists provided with work opportunities

Target for this quarter

6.00 productions and performances

ART-1.3 is more than 20 percent under its quarter target of 6. Say why, so the Department does not have to send it back to ask.

How many did you actually deliver?

Enter a number only.

2

☐ There is no result this quarter

How much has been spent on this so far?

In rand. A best estimate is fine.

If you did not reach the target, or have no result, why not?

One or two sentences. Needed when you are more than 20 percent under the target. Leave blank if the target was met.

Two of the planned workshops moved to October when the venue flooded.

5. If you lose signal

Keep going. Each answer is kept on the phone and sent when the signal comes back. The page tells you how many are waiting.

If you close the page, open the same link again. The question number is part of the page address, so you return to the question you were on, with your earlier answers still there.

6. Submit

After the last indicator, Vuka says **All indicators answered**. Tap **Submit to DSAC (1)**.

All indicators answered

You have answered all 12 indicators for Q2 2026/27.

Submitting confirms these figures in your name. The Department can see where every number came from, and can send the report back to you if something needs correcting.

1

Submit to DSAC

Submitting confirms these figures in your name. The Department can see where every number came from, and can send the report back if something needs correcting.

You then see **The Department has your report**. There is no need to submit twice.

If the Department disputes anything, it comes back to you against that one indicator, not as a whole report. You will find it under **Comments**.

Uploading evidence and documents

From **Your reporting**, tap **Documents**.

1. Choose what the document is under **What is it**.
2. Tap **Choose file** and pick it (up to 15MB).
3. Tap **Upload**.

Documents

Upload

What is it

STRATEGIC PLAN

File

Choose file

No file chosen

Up to 15MB. Uploading a document again makes it the next version; earlier versions are kept.

Upload

Held

Nothing uploaded yet.

Open tasks

Nothing outstanding.

[Back to your reporting](#)

Uploading the same document again makes it the next version. Earlier versions are kept. Every upload gets a receipt number, so you can prove what you sent and when. **A receipt is not an approval:** the Department approves or rejects each document separately.

J3. Reviewing submissions

In short: Start with the entities most at risk. Check each figure against its evidence. Approve the submission, or send back only the figures you doubt, with a reason. Nobody can edit a figure.

Who this is for: the DSAC reviewer who checks what the entities submit.

What you will do: decide which entities to look at first, see why each is ranked where it is, check the figures against their evidence, return the ones you dispute, and approve the rest.

There is no control anywhere in Vuka that changes a reported figure. A figure you do not believe is disputed and returned, never edited.

1. Start from Today

Sign in. You land on **Today**, which answers one question: what to look at first.

The screenshot shows the Vuka 'Today' dashboard for user L. Dlamini, a DSAC reviewer. The interface includes a sidebar with navigation links: Today, Review queue, Risk & Alerts, Analytics & Insights, Documents, Workspaces, and Tasks (with a red notification badge). The main content area features a search bar, a language selector (English), and a user profile. A warning banner states: 'Development sign in is enabled. Tokens are not verified and any role can be assumed. Never run a deployed environment this way.' The dashboard is titled 'Good morning, L. Dlamini' and asks 'Which three entities to look at first for Q1 2026/27, and what is waiting on your decision.' It displays four summary cards: '5 Awaiting your decision' (Submitted, not yet approved or returned), '1 Returned' (With the entity, disputed figures reopened), '16 Nothing filed' (Ranked in the queue all the same), and '6 of 28 Approved' (Each in a reviewer name). Below these, a section 'Start with these three' lists entities ranked by risk. The first entity is 'Robben Island Museum' (45 MEDIUM, not submitted) with a 'Largest factor' of being 70 days past a PFMA deadline. The second is 'Boxing South Africa' (33 MEDIUM, Submitted) with a 'Largest factor' of being 25 days past a departmental due date. To the right, 'Quick actions' include 'Work the review queue', 'Risk & Alerts', and 'Decide on documents'. At the bottom right, 'My tasks' list specific review items with due dates.

- The four counts across the top: submissions **awaiting your decision**, **returned** to an entity, entities that have **filed nothing**, and how many are **approved**.
- **Start with these three**: the three entities at the top of the risk ranking, each with its **Largest factor** in words.
- **Quick actions** on the right: the review queue, Risk & Alerts, and deciding on documents.
- **My tasks** under them: work set for you, with due dates. See [Working together](#).

Click **The whole queue, ranked** or **Review queue** in the menu to see every entity.

2. Work the review queue

The queue lists every entity for the quarter under review, **ranked by risk, not by date received**, so the ones that most need attention are at the top.

The screenshot displays the Vuka 'Review queue' for Q1 2026/27. The queue is sorted by risk, showing 28 entities (11 submitted, 16 outstanding, 1 returned). The first entity, 'Robben Island Museum', has a risk score of 45 (MEDIUM) and is 'not submitted'. Its largest factor is being 70 days past the PFMA deadline. The second entity, 'Boxing South Africa', has a risk score of 33 (MEDIUM) and is 'Submitted'. Its largest factor is being 25 days past the departmental due date. The third entity, 'National Library of South Africa', has a risk score of 29 (MEDIUM) and is 'Returned'. Its largest factor is being 12 days past the departmental due date. The interface includes a sidebar with navigation options, a top bar with user information and search, and a 'Recompute scores' button.

1. The risk score and band. Colour is never the only signal: the number and the band word are always shown.
2. The entity, with its status (**Submitted**, **Returned**, **Approved** or **not submitted**), its **Largest factor**, and how many figures and evidence documents it filed and how late.

You can re-sort by **entity** or **date received**, but risk order is what makes the queue readable. Click **show all** at the bottom to list every entity.

After a submission lands, click **Recompute scores** to bring the ranking up to date.

3. Ask why an entity is ranked where it is

Click the score. A panel shows all five signals behind it, each with its weight, what it contributes to the total and a sentence explaining it.

Robben Island Museum 45 MEDIUM

Computed from the signals stored for this reporting period.

Signal	Weight	Contributes
Submission lateness	0.30	30.0
Filed 70 days after a statutory PFMA deadline. This is a breach of the Act, not of a departmental instruction.		
Raw 70,00, weighted to 30,0 of a possible 30		
Evidence gap	0.25	0.0
No targets registered for this year.		
Raw 0,00, weighted to 0,0 of a possible 25		
Spend to delivery divergence	0.20	0.0
Delivery (0%) is keeping pace with spend (0%).		
Raw 0,00, weighted to 0,0 of a possible 20		
Prior audit findings	0.15	15.0
Audit outstanding. The financial statements missed the statutory date, the audit was not completed, and the entity was excluded from the portfolio audit outcomes. There is no assurance of any kind on this entity.		
Raw 0,00, weighted to 15,0 of a possible 15		
Revision churn	0.10	0.0
No targets restated mid-year.		
Raw 0,00, weighted to 0,0 of a possible 10		

The five signals are submission lateness, evidence gap, spend running ahead of delivery, prior audit findings, and targets restated mid-year. Every score is arithmetic from those signals, not a prediction, and can be reproduced by hand. The executive sees exactly the same explanation.

4. Open a submission

Click **open** on the entity's row (1).

5. Dispute a figure you do not believe

1. Click **Dispute this figure** on that figure.
2. Write the reason. The entity sees it against this target only, so say exactly what is wrong.
3. Click **Mark disputed** (1).

HER-1.1 **Number of exhibitions mounted**

	QUARTER TARGET	VARIANCE	DELIVERY AGAINST ANNUAL
2	3	-1 (-33%)	17%

Entered by hand, no source cell

The entity said: Delivery deferred to the following quarter. (Illustrative explanation.)

✓ HER-1.1 register extract Q1 2026-27.pdf ✓ HER-1.1 reconciliation to source Q1 2026-27.p Traceable to source. Satisfies completeness, accuracy.

Confirmed by Reporting Officer (placeholder), 10 Aug 2026 00:00

Reason. The entity sees this against this target only

The register extract lists three exhibitions opening in Q1, but 2 is reported. Please check which figure is right.

1 ✓ **Mark disputed** Cancel

The box closes and the figure now carries a **DISPUTED** label with your reason read back underneath it, so you can see at a glance what will be sent. **Nothing has gone to the entity yet.** Two buttons sit under the reason:

- **Edit the reason** reopens the box with what you wrote.
- **Undo this dispute** takes the mark off entirely.

HER-1.1 **Number of exhibitions mounted** **DISPUTED**

	QUARTER TARGET	VARIANCE	DELIVERY AGAINST ANNUAL
2	3	-1 (-33%)	17%

Entered by hand, no source cell

The entity said: Delivery deferred to the following quarter. (Illustrative explanation.)

✓ HER-1.1 register extract Q1 2026-27.pdf ✓ HER-1.1 reconciliation to source Q1 2026-27.p Traceable to source. Satisfies completeness, accuracy.

Confirmed by Reporting Officer (placeholder), 10 Aug 2026 00:00

Marked as disputed. The register extract lists three exhibitions opening in Q1, but 2 is reported. Please check which figure is right.

It goes back to the entity when you return the submission below. Nothing is sent yet.

Edit the reason Undo this dispute

Dispute as many figures as you need to before you return the submission. A figure that was disputed on an earlier round and is already with the entity says so and offers no undo: that one has left your hands.

6. Return, or approve

The bar at the bottom of the page says, in a sentence, what you have marked so far and what its one button will do.

While **nothing is marked**, the button is **Approve all n figures**:

Nothing is marked. Approving signs off all 20 figures in your name. To send one back, use Dispute this figure on the row.

[Export with provenance](#) [Approve all 20 figures](#)

There is no control on this screen that changes a reported figure, and no endpoint behind one. A figure you do not believe is disputed and returned, not edited.

As soon as **anything is marked**, it becomes **Return n figures to the entity (1)**:

One figure is marked. Returning sends it back with its reason; everything else stays as filed.

[Export with provenance](#) [Return 1 figure to the entity](#)

There is no control on this screen that changes a reported figure, and no endpoint behind one. A figure you do not believe is disputed and returned, not edited.

Export with provenance downloads the filing with the source of every figure.

Returning

Click **Return n figures to the entity**. Vuka lists each disputed figure with your comment. Add an overall note if it helps, then click **Return 1 figure** (or however many you disputed).

The screenshot shows the Vuka interface. On the left is a sidebar with navigation links: Today, Review queue (selected), Risk & Alerts, Analytics & Insights, Documents, Workspaces, and Tasks (with a red notification badge). The main content area shows a submission for 'Iziko Museums of South Africa' with a status of '18 LOW'. A modal titled 'Return this submission' is open, displaying the following text: 'The entity sees each comment against the specific target it belongs to, not as one note about the whole submission. Only the disputed targets are reopened.' Below this, it shows a specific figure: 'HER-1.1 Number of exhibitions mounted' with a comment: 'The register extract lists three exhibitions opening in Q1, but 2 is reported. Please check which figure is right.' There is a text input field for 'An overall note, if one helps (optional)'. At the bottom of the modal, it says 'This action is recorded against your name and the time.' and has 'Cancel' and 'Return 1 figure' buttons. In the background, the submission details are visible, including a table with columns for 'Submitted', 'Status', and 'Action'. The 'Status' column shows '2' for the 'HER-1.1' figure. The 'Action' column shows 'Marked' for the 'HER-1.1' figure. The 'Return 1 figure' button is highlighted in the background.

The rest of the submission stays as filed, with its original confirmation and author. The reporter sees your comment against that figure on their home page (see [If a figure is returned to you](#)).

You go back to the queue, where a line at the top confirms what was recorded.

Returned

Largest factor:

Submitted an average of 12 days past the departmental due date across 1 prior periods. Quarterly performance reporting for a Schedule 3A entity has no deadline in regulation, so this is measured against the department's own instruction.

10 of 18 targets reported, 3 evidence documents, submitted 12 days late

Approving

Open a submission you are satisfied with and click **Approve all *n* figures**. The dialog warns you how many figures have no evidence: they stay on the record as unverifiable, and approving does not change that. Click **Approve** to confirm.

Vuka user manual

53 of 82

Approval is recorded with your name and the time, one submission at a time. There is no bulk approval. Back in the queue, the line at the top confirms it and the entity's row reads **Approved**.

With no connection, a return or an approval waits in the outbox and the line says so. It goes as soon as there is a connection, and your disputes and the return go together and in order. See [Working together](#).

7. Risk & Alerts

Risk & Alerts in the menu is the early warning view across all 28 entities: how many are in each band (critical 70 or above, high 50 to 69, medium 25 to 49, low below 25), then every entity with its band, its largest contributing factor, its score and whether it has reported.

Filter by band with the buttons above the table. Click **View** on a row, or the score, for the signals behind it. The weights and band limits are fixed and published at the foot of the page.

J4. The portfolio view

In short: See all 28 entities on one page, open any one to see why it scores as it does, follow the trends over the years, and ask Karabo. Nothing on these screens changes a figure.

Who this is for: the Director-General and other DSAC executives who need the whole portfolio at a glance and must be able to explain any one entity, for example before a portfolio committee meeting.

What you will do: read the portfolio totals, find the entities that need attention, open one, see why it scores as it does, and look at what it costs to deliver.

This view is read only. Nothing on these screens changes a figure.

1. Read the portfolio

Sign in. You land on **Portfolio**, for the quarter under review.

1. The totals across the top, starting with the allocation: the rands **allocated this year**, the **funded bodies**, how many **submitted this quarter**, **targets reported** against those registered, **outstanding submissions**, and **critical entities** (a score of 70 or above).
2. **By risk band**: every entity, grouped by band, with its score and its allocation. Use **By sector** to narrow it to arts, heritage, libraries, sport or language.

3. **Ask Karabo**, to ask a question in ordinary words (step 6). **Analytics, charts and export** beside it opens step 5.

The allocations are the published figures from the Estimates of National Expenditure 2026, Vote 37, Table 37.3.

2. Open an entity

Click an entity's name (1). Click **why** in its corner for the score explanation straight away.

Every band shows its score and its word as well as its colour, because a briefing note goes out in greyscale. Click any name for the figures behind its score.

MEDIUM 4	RobbenIsland why 45 R96.8m	BoxingSA why 33 R21.5m	NLSA why 29 R137.9m	PanSALB why 26 R139.2m	
LOW 24	FreedomPark why	Iziko why	PACOFs why	Ditsong why	Playhouse why

The entity page follows the accountability chain from left to right: what it was **allocated**, what it **promised** (targets in its Annual Performance Plan), what it **reported**, and how much of that is **verified** with evidence. Each figure names the document it comes from. Under it are the allocation by year and its audit history from the Auditor-General.

sport, arts & culture
 Department:
 Sport, Arts and Culture
 REPUBLIC OF SOUTH AFRICA

Better reporting. Stronger
 institutions. A brighter South
 Africa.

The panel shows each of the five signals with its weight, its contribution and a sentence. It is the same explanation the reviewer sees, so the Department always gives one account of the same fact.

4. Ask what it costs

Click **Unit cost** and pick an **Indicator**. Vuka compares cost per unit delivered three ways:

- **Against its own plan:** planned spend over planned units, beside actual spend over actual units. Both the numerator and the denominator are shown so anyone can check the sum.
- **Against its own history:** the same indicator in earlier years, where there is a record.
- **Against sector peers:** only other entities in the same sector, and only where a peer group exists.

Vuka does **not** compare cost per outcome across sectors. A library item and a boxing licence are not comparable outputs, so there is no screen that does it.

5. Is the portfolio getting better?

Click **Analytics & Insights** in the menu. Four headline measures across the top, then the portfolio drawn rather than tabulated:

- **Money and delivery, year on year.** Two charts side by side: what was allocated each year, and the share of targets the Auditor-General recorded as achieved. They are two charts rather than one because putting rands and a percentage on the same picture is the most common way a chart misleads.
- **Audit outcomes.** One bar per year, best opinions on the left, with the counts written out beside each bar.
- **Filing.** Who filed on time, who was late and who has not filed, quarter by quarter, beside the share of figures that met their quarter target.
- **By sector.** Rands and delivery side by side, never divided into one another.
- **Who moved.** One row per entity, showing where it was in the earlier audited year and where it is now, across only the entities with published counts in both years.

A year the Auditor-General has not yet audited draws **no bar** and says why. It never draws a bar of zero.

Every chart has **Show the figures** beside it, which opens the exact table it was drawn from. That is the table to quote from: the picture is for the glance, the table is the record.

6. Ask a question in the meeting

Click **Ask Karabo** at the top of Analytics or the Portfolio. Karabo opens beside the page. Click a suggested question or type your own, for example *Why is Robben Island scored critical?*

Karabo

Ask about any body the Department funds

why is Robben Island scored critical?

The record does not show Robben Island scored "critical." Robben Island Museum is scored 45, band medium for Q1 2026/27, according to Vuka risk engine, stored signals for Q1 2026/27.

Why: the largest signals are (source as above)

- Submission lateness: filed 70 days after a statutory PFMA deadline (a breach of the Act), contribution 30.
- Prior audit finding: audit outstanding; financial statements missed the statutory date and the audit was not completed, contribution 15.
- Spend-delivery divergence: delivery (0%) keeping pace with spend (0%), contribution 0.
- Revision churn: no targets restated mid-year, contribution 0.
- Evidence gap: no targets registered for this year, contribution 0.

The score is the sum of those stored signal contributions, per the same source.

WHERE THIS CAME FROM

- Robben Island Museum, risk score: Vuka risk engine, stored signals, Q1 2026/27

Karabo answers only from Vuka's records, with your own access, and can still be wrong. Check the source under each answer.

The answer gives the figure, the reasons, and underneath, **where this came from**. Here Karabo also corrects the question: Robben Island is medium, not critical. Follow up in the same conversation, for example *How is Iziko doing this quarter?*

Karabo

Ask about any body the Department funds

How is Iziko doing this quarter?

The score is the sum of those stored signal contributions, per the same source.

WHERE THIS CAME FROM

- Robben Island Museum, risk score: Vuka risk engine, stored signals, Q1 2026/27

Karabo answers only from Vuka's records, with your own access, and can still be wrong. Check the source under each answer.

Vuka user manual

62 of 82

Karabo answers only from Vuka's records, with your own access, so it tells an executive nothing the Portfolio would not. If the record does not hold the answer it says so rather than guessing. It can still be wrong, which is why the source is under every answer: a figure quoted in a portfolio committee has to be defensible. More in [Asking Karabo](#).

Taking it to a meeting

Two buttons at the top of **Analytics**:

- **Download as CSV** saves the whole view (years, quarters, sectors, movement and the sources) as one spreadsheet, headed in the language you have chosen. A blank cell means *not published* or *not yet due*, and the file says so on its fifth line. It never means zero.
- **Print or save as PDF** lays the screen out as a committee pack: the menu and the buttons come off, the charts keep their fill, and nothing carrying a figure breaks across a page.

To take a single entity's figures on paper, open its page and use your browser's **Print** (Ctrl+P, or Cmd+P on a Mac). The risk bands carry their score and band word as well as their colour, so they still read correctly in greyscale.

J5. The citizen view

In short: Anyone can see what each published entity received, promised and delivered, in five languages, on a phone, with no account.

Who this is for: any member of the public who wants to know what a sport, arts or culture body was given and what it delivered. No account is needed.

What you will do: find an organisation, open its record, go on to its own website, and read it all in your language.

Only organisations the Department has chosen to publish appear here.

1. Open the list

Go to the Vuka address followed by `/public` , or follow a link someone shared.

- **Search for an organisation** by name, and tap **Search**.
- Or tap a group: **Sport**, **Arts** or **Culture** (heritage, libraries and language bodies are under Culture). The number beside each is how many published organisations it holds.

Under **Published organisations** a line counts them, the public funds allocated to them this year, and how many of their targets were achieved.

2. Open an organisation's record

Each card shows the organisation's group, its allocation for the year, the last quarter it reported with the Department's approval, and how many of its targets it has achieved. Tap **View organisation** (1).

The record follows the money in order, under **The accountability chain**: **01. Received** (the funds allocated), **02. Promised** (the targets it committed to this year) and **03. Delivered** (targets with a result in an approved report). Each figure names the document it comes from.

Further down are the funding detail, the audit outcomes published by the Auditor-General under **Accountability history**, and **Where did this information come from?**. Figures are as reported by the organisation and reviewed by DSAC, and published with the Department's approval.

3. Go to the organisation itself

Under **Useful links** is **Visit** (1), which opens the organisation's own website in a new tab.

Figures are as reported by the entity and reviewed by the Department of Sport, Arts and Culture. Published with departmental approval.

Funding

Allocation	R 73 801 000
Programme	Programme 3: Arts and Culture Promotion and Development
Financial year	2026/27

Source: Estimates of National Expenditure 2026, Vote 37, Table 37.3, 2026/27

Useful links

[Visit Artscape ↗](#)

This is the entity's own website. It opens in a new tab, and Vuka does not control what is published there.

Where did this information come from?

Each figure on this page names the document it comes from, so you can trace it back.

Accountability history

Audit outcomes published by the Auditor-General

2024/25

Vuka holds one thing about a funded body: what it was given and what it reported against it. Once you have read that, the next questions (what is on this month, how to visit, who runs it) are answered on the organisation's own site, not here. The link is there so you do not have to go looking.

Two things to know:

- It is the organisation's website, not a government page. DSAC does not control what is published there, and the page says so under the link.
- Where no address is on record, there is no link. A wrong link under a government masthead would send you somewhere that is not the organisation at all, so Vuka would rather show nothing.

4. Read it in your language

Choose **English**, **Afrikaans**, **isiZulu**, **isiXhosa** or **Sesotho** from the language picker at the top of every page.

A link you copy keeps the language, so the person you send it to opens the same page in the same language.

5. Save data with the light version

On a slow connection or a small data bundle, tap **Light version, uses less data** at the bottom of the page. It shows the same organisations and figures as plain text, with no pictures. Vuka also chooses the light version by itself when your phone asks to save data or reports a slow connection. Tap **Full version, with charts and search** to go back.

Public entity performance

Working together

In short: Documents with their versions and receipts, tasks you set for each other, live comments, the audit trail of who did what and when, and carrying on without a connection.

Who this is for: everyone who signs in: reporters, reviewers and administrators.

What you will do: find an entity's documents and their versions, comment on a filing, set and close tasks, open an entity's workspace, read the audit trail, and keep working without a connection.

1. Documents

Click **Documents** in the menu. A reporter sees their own entity's documents straight away. A DSAC reviewer chooses the entity from the list at the top right.

The screenshot shows the Vuka web application interface. On the left is a dark sidebar menu with options: Today, Review Queue, Risk & Alerts, Analytics & Insights, Documents (highlighted), Workspaces, and Tasks. The main content area is titled 'Documents' and shows a summary for 'Iziko Museums of South Africa' with four status tiles: 12 Documents, 12 Current versions, 12 Receipts, and 1 Approved. Below this is a table of documents with columns: FILE, VERSION, RECEIPT, DECISION, SATISFACTION, and MICROSOFT 365. The table lists various documents like 'Attendance-register-Q2.pdf', 'Iziko-Q2-2026-27-completed.xlsx', and 'Annual Performance Plan 2026-27.pdf'.

FILE	VERSION	RECEIPT	DECISION	SATISFACTION	MICROSOFT 365
Attendance-register-Q2.pdf	V1	current	pending	validity	not configured
Attendance-register-Q2.pdf	V1	current	pending	complete	not configured
Iziko-Q2-2026-27-completed.xlsx	V1	current	pending	not stated	not configured
Audit action plan 2025-26.pdf	V3	current	pending	not stated	not configured
HER-14 register extract Q1 2026-27.pdf	V1	current	pending	complete	not configured
HER-2.1 reconciliation to source Q1 2026-27.pdf	V1	current	pending	accuracy	not configured
HER-2.3 signed attendance register Q1 2026-27.pdf	V1	current	pending	validity	not configured
HER-11 register extract Q1 2026-27.pdf	V1	current	pending	complete	not configured
HER-11 reconciliation to source Q1 2026-27.pdf	V1	current	pending	accuracy	not configured
HER-1.2 signed attendance register Q1 2026-27.pdf	V1	current	pending	validity	not configured
Q1 2026-27 quarterly report (signed).pdf	V1	current	pending	not stated	not configured
Annual Performance Plan 2026-27.pdf	V1	current	Approved by Thandi Mokoena, DSAC Reviewer (demo)	not stated	not configured

The tiles count the **documents**, how many are **current versions**, how many are **receipted** (the Department acknowledges holding them) and how many are **approved** by a named official.

Each row in **Files** shows:

- **Version.** Uploading a file with the same name makes it the next version, and the earlier ones are kept. **All versions** lists them.

- **Receipt.** Every upload gets a receipt number, so the entity can prove what it sent and when. **A receipt is not an approval.**
- **Decision.** Pending, approved or returned, and by whom.
- **Satisfies.** Which part of the Auditor-General's reliability test the document supports: validity, accuracy or completeness.
- **Microsoft 365.** Whether its copy in the entity's SharePoint library has synced, where one is bound (see [Setting up, step 4](#)). **Sync now** picks up files saved in that library.
- **Open,** to read the document in the page.

Reporters add evidence against a figure while confirming it (see [J1, step 5](#)), and plans, reports and financials from the phone **Documents** page (see [J2](#)).

2. Tasks

Click **Tasks** in the menu. The number on the menu item is how many of your tasks are still open.

Tasks
What is assigned to you, and what is waiting on somebody else.

4 Open
Assigned to you

0 Overdue
Past the due date

0 Done
Closed by you

1 ☒ Set a task

My tasks Open Done All

TASK	ASSIGNED BY	DUE	STATUS
Review the Iziko Q1 submission Submitted eleven days after the due date. Six pieces of evidence are waiting for a decision.	DSAC Administrator (demo)	19 Sept 2026	Open Mark done
Chase Robben Island Museum for its Q1 report Nothing filed for Q1, which fell due on 30 July. Its 2024/25 audit is outstanding.	DSAC Administrator (demo)	21 Sept 2026	Open Mark done
Review the Boxing SA Q1 submission Seven of eighteen indicators reported, twenty five days late.	DSAC Administrator (demo)	22 Sept 2026	In progress Mark done
Advise whether HER-3.4 may be reported cumulatively The indicator counts learners reached. Our APP technical indicator description is silent on whether a learner reached in Q1 and again in Q2 counts twice. external	Nomsa, Reporting Officer (demo)	26 Sept 2026	Open Mark done

The tiles count your tasks that are **open**, **overdue** and **done**. **My tasks** lists each one with who set it, when it is due and its status. Filter with **Open**, **Done** and **All**, and click **Mark done** when it is finished.

To give someone work, click **Set a task** (1).

1. Choose the **Entity** it is about.
2. Choose who it is **Assigned to**: someone at the Department, or one of that entity's own reporters.
Nobody from another entity is offered.
3. Say **What needs doing**, add detail if it helps, and a due date if there is one.
4. Click **Set task**. It is on their list at once.

A task that crosses between the Department and an entity is marked **external**. Vuka works that out from who set it and who it is for; nobody ticks it. Reporters, reviewers and administrators can set tasks. The executive's view is read only, so it has no Tasks page.

3. Comments on a filing

Comments sit at the foot of a filing, on the reporter's confirmation screen and on the reviewer's submission screen. A comment can be on the filing as a whole or against one figure. Both sides see new comments appear within a few seconds, without reloading the page.

A reviewer's dispute is a comment against the figure (see [J3, step 5](#)).

4. Workspaces

Click **Workspaces** in the menu. Each entity has one: the place its documents live, and whether they are mirrored to Microsoft 365.

Each card opens that entity's **Documents**, its **Tasks** and its **Entity profile**. The notice at the top says whether Microsoft 365 is configured for this deployment.

5. The audit trail

The audit trail answers who did what, to which figure, and when. Open it at the Vuka address followed by `/logs` . It has no item in the menu yet, so type the address or keep a bookmark.

45 MEDIUM

Robben Island Museum

not submitted

Largest factor: Filed 70 days after a statutory PFMA deadline. This is a breach of the Act, not of a departmental instruction.

Nothing has been opened for this period.

see the entity

33 MEDIUM

Boxing South Africa

Approved

Largest factor: Submitted an average of 25 days past the departmental due date across 1 prior periods. Quarterly performance reporting for a Schedule 3A entity has no deadline in regulation, so this is measured against the department's own instruction.

7 of 18 targets reported, 1 evidence documents, submitted 25 days late

Quick actions

- Work the review queue
Every entity, including those that filed nothing
- Risk & Alerts
Recompute scores after a submission lands
- Decide on documents
Receipts and approvals, per entity

My tasks

View all

- Review the Iziko Q1 submission
Due 19 Sept 2026
- Chase Robben Island Museum for its Q1 report
Due 21 Sept 2026
- Review the Boxing SA Q1 submission
Due 22 Sept 2026
- Advise whether HER-3.4 may be created separately

- Screens you have already opened still show, with what they held when you last saw them.
- Comments, reviews, confirmed figures, submissions and task changes you make are **kept on this device** and listed until they are sent. They go, in order, as soon as the connection returns.
- The Department's own checks still apply when they arrive. If one is refused, the changes kept after it are held back rather than sent out of order.
- They are sent only under the same person's sign-in. **Signing out deletes them**, after asking, so a shared computer never opens on the last person's work.

On a phone, answers to indicators work the same way (see [J2, step 5](#)).

Presenting Vuka

In short: Reset the demonstration copy, then follow the twelve steps in section 2. Section 3 shows where each requirement in the brief is answered on screen, and section 4 what to say before you are asked.

Who this is for: whoever demonstrates Vuka to the GovTech 2026 panel or to the Department.

What you will do: reset the demonstration copy, walk the quarter from deadline to citizen in one pass, and answer, screen by screen, each requirement in the DSAC challenge statement.

The whole run takes about twelve minutes. Every step below is a real action against real data: the 28 entities and their allocations are the published figures, and the quarterly figures, names and comments are illustrative, as the screens say.

1. Before you start

1. Give Karabo its model. On a Mac, set these in the terminal you will start the backend from (on Windows, `run-local.ps1` reads them from `karabo.local.ps1` instead). Keep the key in a file outside the repository:

```
export AZURE_OPENAI_ENDPOINT=https://<resource>.openai.azure.com
export AZURE_DEPLOYMENT_NAME=<deployment name>
export AZURE_OPENAI_API_KEY_FILE=/path/to/file/holding/the/key
```

2. In the same terminal, put the demonstration copy back to its seeded state and start it:

```
./run-demo.sh --reset
```

3. In a second terminal start the dashboard, then open `http://localhost:5173` :

```
cd frontend && VITE_DEV_AUTH=true npm run dev
```

4. Have the completed demonstration template to hand. The reset writes it to `~/vuka/demo/Iziko_Q2-2026-27_completed.xlsx` . It has one row with no figure and one indicator code that is not registered, and every other row is clean.
5. Have one small PDF to hand to attach as evidence.
6. Open a second browser window (or a private one) for the reporter, so you can show the return arriving without signing out.
7. Check Karabo is connected: open it on the landing page. The opening message should say what it answers from, not that it is not connected.

The development sign-in is on in this copy. **Never run it anywhere another person can reach.** Switch roles from the **Demonstration accounts** panel at the foot of the sign-in page.

2. The run, in order

#	Sign in as	Do	Say	Manual
1	Nobody	Open the landing page. Switch the language to isiZulu, then back. Open the Ask Karabo tab and show its four questions	Five languages across every screen. Karabo is on every page, and answers from Vuka's records with the asker's own access	Getting in
2	Administrator	Set Q2's due date to within 30 days, then click Set	For Schedule 3A the regulation sets no day count, so the date is the Department's instruction. A passed date is locked	Setting up, step 2
3	Administrator	Issue Artscape a reporter account. Publish Artscape and Iziko	There is no sign-up. The account is tied to one entity. Publication is a departmental decision, and the administrator cannot approve figures	Setting up, steps 3 and 5
4	Entity reporter (Iziko)	Show the deadline warning. Upload completed file, Upload and parse	21 rows read, 20 matched, one held aside rather than dropped	J1, steps 1 to 3
5	Entity reporter	On HER-1.3, type 2 (reason required), give a reason, attach the PDF. Confirm all 20, Submit	Every figure carries its source cell. Confirming is in your name and cannot be edited. A figure with no evidence is unverifiable	J1, steps 4 to 7
6	DSAC reviewer	Today , then Review queue . Click Robben Island's score	Ranked by risk, not by date. Five signals, each weighted and explained. Arithmetic, reproducible by hand	J3, steps 1 to 3
7	DSAC reviewer	Open Iziko Q1. Dispute HER-1.1, then Return 1 figure to the entity	Nothing is ever edited. Only the disputed figure goes back	J3, steps 4 to 6
8	Entity reporter (second window)	Watch the returned notice arrive on My reporting	The reviewer's words, against that one figure, without a reload	J1, If a figure is returned
9	DSAC executive	Portfolio , open Boxing SA, Explain the score, Unit cost	Allocated, promised, reported, verified. Unit cost only against its own plan, its history and same-sector peers	J4, steps 1 to 4
10	DSAC executive	Analytics & Insights. Ask Karabo: Why is Robben Island scored critical?	Year on year, audit outcomes, filing, sectors, who moved. Karabo corrects the question (it is medium, 45), gives the five signals and names its source	J4, steps 5 and 6; Asking Karabo
11	Nobody	Citizen View on a phone-sized window. Open Artscape, Visit Artscape , the light version. Then	What was received, promised and delivered, only for published entities, in five languages, on a small data	J5; Asking Karabo, step 3

#	Sign in as	Do	Say	Manual
		ask Karabo <i>What was Iziko allocated this year?</i>	bundle. A visitor's Karabo sees only what is published	
12	Reviewer, if time allows	/logs , then Export CSV	Every event read from the record it describes, in a named person's name	Working together, step 5

If time is short, keep steps 2, 4 to 8 and 10. They carry the deadline, the evidence, the return and the question box, which are the parts nobody else will show.

3. Where each requirement in the brief is answered

The challenge statement lists five functional requirements, (a) to (e).

Requirement	Where it is on screen	Honest limit
(a) Analytics. Trends and patterns per entity, audit findings, year-on-year, targets in progress, not started, deadline missed	Analytics & Insights (J4, step 5); the entity page's audit history and Targets for the year (J4, step 2); Portfolio (J4, step 1); Ask Karabo (J4, step 6)	No screen shows staff demographics or job creation. A workforce table exists in the data model and is kept off the public pages on purpose, but nothing draws it yet
(b) Early warning. Risk-based alerts before deadlines are missed; notifications on due dates; countdown at 30 days, 15 days and hourly	Risk & Alerts and the ranked Review queue (J3, steps 2, 3 and 7); the reporter's sign-in warning and countdown (J1, step 1); reminders at 30, 15 and the last day, and on Teams hourly on the last two days (Setting up, step 2)	The score is weighted arithmetic over five published signals, not a trained prediction. Say so as a choice: every alert can be explained and reproduced. Reminder email has not been sent through a real mail relay
(c) Document repository. Plans, APPs, reports and financials uploaded for DSAC review	Documents with versions, receipts and decisions (Working together, step 1); phone Documents upload (J2)	Approving or returning a document works in the system but has no button on the dashboard yet
(d) Workspaces. Microsoft integration, version on save, real-time comments, internal and external tasks, approval on receipt, full mobile working	Workspaces , Tasks and Set a task , live comments (Working together, steps 2 to 4); Microsoft 365 binding and Teams reminders (Setting up, step 4); receipts (Working together, step 1); phone reporting and offline (J2; Working together, step 6)	The Microsoft Graph path is tested against Microsoft's documented response shapes, not a live tenant. Present it as built and untested unless one library has been bound first
(e) Security and privacy. Aligned with South African cybersecurity and privacy principles	No sign-up; each reporter bound to one entity by a claim on their signed token; the executive reads and changes nothing; publication and approval held by two different people; nothing public until published; the audit trail; the POPIA notice on sign-in (Getting in, Setting up)	The demonstration uses the development sign-in. The real sign-in (Firebase) is built; show that it exists rather than claiming the demo uses it

4. Say these before you are asked

- **The quarterly figures, names, comments and tasks are illustrative.** The allocations for all 28 entities are real, from the Estimates of National Expenditure 2026, Vote 37, Table 37.3, and sixteen entities carry published audit outcomes.
- **Entity Registration and Forgot password are designs.** Each says so on screen.
- **Karabo needs its model connected before the demo.** It runs on a Microsoft Foundry deployment, set as in section 1. Without it, Karabo says it is not connected and answers nothing. Answers come only from Vuka's records, with the caller's own access, and list their sources; it can still be wrong, so point at the source.
- **The four translations are machine-drafted and unreviewed.** The interface is fully externalised, so reviewing them is a content task. PanSALB, one of the 28 entities, is the obvious partner.

- **Robben Island scores 45, medium**, not the 74, critical, the design wireframes show. The published history for it is thin, and the score only uses what is stored.
- **Vuka is not a second eQPRS**. DPME's system is where the numbers go; Vuka is where they can be defended, and it exports into DPME's shape.
- **Two entry points are not yet in the menu**. The audit trail is reached at `/logs` , and the document approve and return actions have no button yet.
