

User manual

Performance reporting and review for the Department of Sport, Arts and Culture and the public entities it funds. Five journeys, each followed from sign-in to finish in the order the demonstration presents them, with screenshots and the presenter's script.

Version 4, 19 September 2026. The demonstration journeys. Screenshots are from a demonstration copy of Vuka: the 28 entities and their allocations are real; quarterly figures, reviews and names are illustrative.

Introduction

Vuka in one minute

The Department of Sport, Arts and Culture (DSAC) funds 28 public bodies: museums, theatres, arts councils, libraries, sport and language bodies. Every quarter each of them must tell the Department what it achieved against the targets it promised. Vuka is where that happens.

- **Entities report** their figures, and attach the document each figure came from.
- **The Department checks** them, starting with the entities most at risk, and approves them or sends back the ones it doubts.
- **Leadership sees** the whole portfolio at a glance, and can ask questions in ordinary words.
- **The public sees** what each published body was given and what it delivered.

The five journeys

Each chapter follows one person from signing in to finishing their work, without stopping to show anyone else's screen. They are in the order the demonstration plays them.

#	Person	What they do	Chapter
1	Administrator (DSAC)	Brings the Q2 deadline forward, gives Artscape a reporter account, publishes entities to the public	The administrator
2	Reviewer (DSAC)	Works the Q1 queue by risk, sends one of Iziko's figures back, approves Boxing South Africa	The reviewer
3	Reporter (Iziko Museums)	Is warned about Q2, answers the figure the reviewer sent back, then files Q2 from the template	The reporter
4	Executive (DSAC leadership)	Reads the portfolio, explains one entity's score, looks at the trends, asks Karabo	The executive
5	The public	Finds an entity, reads its record in their language, asks Karabo	The public

Why the reviewer comes before the reporter: the entities filed Q1 in August, so on the day of the demonstration the reviewer is working through those filings while Q2 is still open. Doing the review first means the reporter signs in once and meets everything waiting for them in one sitting.

The script for presenting it is [Demonstration script](#).

Words you will see

Word	What it means
Entity	One of the 28 bodies DSAC funds, for example Iziko Museums or Boxing South Africa
Quarter	A three-month reporting period. Q1 is April to June, Q2 is July to September
Target	Something the entity promised to deliver this year, for example "12 exhibitions mounted"
Figure	What the entity says it actually delivered against a target this quarter
Evidence	The document behind a figure: an attendance register, a signed report, an invoice
Confirm	The reporter's promise that a figure is right. It is recorded in their name and cannot be edited
Submit	Sending the whole quarter to the Department
Return	The Department sending back one or more figures it doubts, with a reason
Unverifiable	A figure with no evidence attached. It cannot be checked at all
Risk score	A number from 0 to 100 saying how much attention an entity needs. Always explained, never a black box
Published	Visible to the public. Nothing is public until the Department publishes it
Karabo	The assistant. Ask it a question and it answers from Vuka's records, with its sources

Signing in

Open the Vuka address. The landing page offers **Sign in** (1). The **Ask Karabo** tab (2) is on the right edge of every page, before and after signing in.

On a real deployment each person signs in with the email address and password DSAC issued them. There is no sign-up. In the demonstration copy, the sign-in page also has a **Demonstration accounts** panel under the form. Click a role to sign in as that person.

Every signed-in page has a **language** picker at the top (English, Afrikaans, isiZulu, isiXhosa, Sesotho) and a menu down the left that holds only what that person can use.

About the screenshots

The screenshots were taken on the demonstration copy, in the order of this manual, so each screen shows what the journey before it left behind. The 28 entities and their allocations are real, from the Estimates of National Expenditure 2026, Vote 37. Quarterly figures, comments and people's names are illustrative.

Two things in them appear only in the demonstration copy: the orange strip reading "Development sign in is enabled", and the Demonstration accounts panel.

Karabo's answers are real answers from the connected model. Asked again, it may word them differently; the figures and sources stay the same.

Red numbered boxes were added to show where to click. They are not part of the screen.

1. The administrator

In short: The administrator decides when each quarter is due, who may report for each entity, and which entities the public can see. They never touch a reported figure.

Signs in as: Administrator, from the Demonstration accounts panel.

The journey: open Administration, bring the Q2 deadline forward, give Artscape a reporter account, and publish four entities to the public.

Step 1. Open Administration

After signing in you land on **Administration**.

Transparent. Accountable.
Impactful.

16
No targets registered
Nothing to report against yet

Submission deadlines

For a Schedule 3A entity, Treasury Regulation 30.2.1 sets no day count for quarterly performance reporting, so the date is the Department instruction and is set here, for every entity at once. Reporters are warned when they sign in within thirty days of it, and reminded at thirty days, fifteen days and on the last day.

QUARTER	PERIOD	DUE	BASIS	CHANGE
Q1 2026/27	01 Apr 2026 to 30 Jun 2026	30 Jul 2026 51 days late	Departmental instruction	Passed, fixed
Q2 2026/27	01 Jul 2026 to 30 Sept 2026	09 Oct 2026 20 days left	Departmental instruction	2026/10/09 Set
Q3 2026/27	01 Oct 2026 to 31 Dec 2026	30 Jan 2027 133 days left	Departmental instruction	2027/01/30 Set
Q4 2026/27	01 Jan 2027 to 31 Mar 2027	30 Apr 2027 223 days left	Departmental instruction	2027/04/30 Set

Entities and their reporters

Entities connect sign up. Each reporter account is issued here for one named entity, and the person it is issued to can only sign in. Publication is a departmental decision.

The three counts at the top say how many entities are **published** to the public, how many have **no reporter account** yet, and how many have **no targets registered**. Under them is the table of **Submission deadlines**, one row per quarter.

Step 2. Bring the Q2 deadline forward

Every DSAC entity is a Schedule 3A public entity, and the regulations set no day count for its quarterly report. So the due date is the Department's instruction, and it is set here.

Vuka user manual

7 of 52

1. In the **Q2 2026/27** row, pick the new date in the **Change** column (1). Here, 9 October 2026.
2. Click **Set** (2).

Submission deadlines

For a Schedule 3A entity, Treasury Regulation 30.2.1 sets no day count for quarterly performance reporting, so the date is the Department instruction and is set here, for every entity at once. Reporters are warned when they sign in within thirty days of it, and reminded at thirty days, fifteen days and on the last day.

QUARTER	PERIOD	DUE	BASIS	CHANGE
Q1 2026/27	01 Apr 2026 to 30 Jun 2026	30 Jul 2026 51 days late	Departmental instruction	Passed, fixed
Q2 2026/27	01 Jul 2026 to 30 Sept 2026	30 Oct 2026 41 days left	Departmental instruction	2026/10/09 Set
Q3 2026/27	01 Oct 2026 to 31 Dec 2026	30 Jan 2027 133 days left	Departmental instruction	2027/01/30 Set
Q4 2026/27	01 Jan 2027 to 31 Mar 2027	30 Apr 2027 223 days left	Departmental instruction	2027/04/30 Set

Entities and their reporters

Entities consist of us. Each reporter account is issued here for one named entity, and the access it is issued to one entity is in Publication (as departmental decision).

The row changes at once: due 9 October, 20 days left.

Q2 2026/27	01 Jul 2026 to 30 Sept 2026	09 Oct 2026 20 days left	Departmental instruction	2026/10/09	Set
------------	-----------------------------	-----------------------------	--------------------------	------------	-----

This one date drives everything else: every reporter's countdown, the reminders at 30 days, 15 days and on the last day, and the lateness part of each entity's risk score. Because Q2 is now due within 30 days, Iziko's reporter will be warned the next time they sign in (see [the reporter, step 1](#)).

Vuka will not let a date be moved once it has passed, because lateness was already measured against it. The row then says **Passed, fixed**, as Q1 does. Every change is written to the audit log in the administrator's name.

Step 3. Give Artscape a reporter account

Scroll to **Entities and their reporters**. Each row is one entity, with its sector, its targets for the year, its reporters, and whether the public can see it.

Transparent. Accountable. Impactful.

Reporter account for Artscape

The account can report for Artscape and nothing else. The person signs in; they cannot sign up, and they cannot choose a different entity.

Full name

Thabo Nkosi

Work email

thabo.nkosi@artscape.example

Issue an account Cancel

The row now lists Thabo Nkosi as Artscape's reporter.

Artscape fc4661eb-cd6b-4682-862e-6546a65a2913	Arts	12	Thabo Nkosi (no credential) Issue an account	not published	Configure	Publish
--	------	----	---	---------------	-----------	---------

That account can report for Artscape and nothing else. Nobody can sign up to Vuka or choose their own entity: the entity is part of the account the Department issues. On a real deployment Vuka gives the administrator a link to send the person, so they set their own password. Here the screen says **no credential**, because the demonstration copy has no sign-in service behind it.

(The **Configure** button, marked 2, links an entity's documents to Microsoft 365. It is not part of this journey.)

Step 4. Publish entities to the public

Nothing is public until the Department says so. Every entity starts unpublished.

1. Click **Publish** (3 in the row above) for Artscape, Iziko Museums, the South African Heritage Resources Agency and Robben Island, and for Boxing South Africa and the Market Theatre.
2. Each row's **Citizen view** column changes to **published** (1), and the button becomes **Unpublish**.

The screenshot shows the Vuka administration interface. On the left is a sidebar with navigation options: Administration, Workspaces, Tasks (with a red notification badge), and Citizen View. The main area displays a table of entities. The table has columns for entity name, category, status, and actions. The 'Iziko Museums of South Africa' row is highlighted, and its 'published' status is circled in red with a '1' next to it. The 'Unpublish' button is visible for this row.

Entity Name	Category	Status	Actions
Die Afrikaanse Taalmuseum en -monument	Language	none registered	Issue an account, not published, Configure, Publish
Ditsong Museums of South Africa	Heritage	none registered	Issue an account, not published, Configure, Publish
Freedom Park	Heritage	30 none issued	Issue an account, not published, Configure, Publish
Iziko Museums of South Africa	Heritage	20 Nomsa, Reporting Officer (demo)	1 published, Issue an account, Configure, Unpublish
KwaZulu-Natal Museum	Heritage	none registered	Issue an account, not published, Configure, Publish
Luthuli Museum	Heritage	none registered	Issue an account, not published, Configure, Publish
Mandela Bay Theatre Complex	Arts	none registered	Issue an account, not published, Configure, Publish
Market Theatre Foundation	Arts	40 none issued	published, Issue an account, Configure, Unpublish

The administrator's journey ends here. Note what they could not do: change a figure, or approve a submission. Deciding what the public sees and approving what it will see are two different people's jobs.

2. The reviewer

In short: The reviewer starts with the entities most at risk, checks each figure against its evidence, and either approves a submission or sends back only the figures they doubt. Nobody can edit a figure, not even the reviewer.

Signs in as: DSAC reviewer (L. Dlamini).

The journey: see what needs attention today, open the queue ranked by risk, find out why an entity is ranked where it is, send one of Iziko's Q1 figures back, approve Boxing South Africa, and look at the risk picture across all 28 entities.

Step 1. Today

After signing in you land on **Today**. It answers one question: what to look at first.

The screenshot shows the Vuka 'Today' dashboard for user L. Dlamini, a DSAC reviewer. The dashboard is divided into several sections:

- Header:** Vuka logo, search bar, language (English), user profile (L. Dlamini, DSAC reviewer), and a 'Ask Karabo' button.
- Summary:** A row of four cards showing submission counts: 5 Awaiting your decision, 1 Returned, 16 Nothing filed, and 6 of 28 Approved.
- Start with these three:** A section titled 'Ranked by risk, not by date received. Click a score for the five signals behind it.' It lists two entities: Robben Island Museum (score 45, MEDIUM, not submitted) and Boxing South Africa (score 33, MEDIUM, Submitted). Each entity card shows a 'largest factor' and a 'see the entity' button.
- Quick actions:** A section with three items: 'Work the review queue' (Every entity, including those that filed nothing), 'Risk & Alerts' (Recompute scores after a submission lands), and 'Decide on documents' (Receipts and approvals, per entity).
- My tasks:** A section titled 'View all' with four tasks: 'Review the Iziko Q1 submission' (Due 19 Sept 2026), 'Chase Robben Island Museum for its Q1 report' (Due 21 Sept 2026), 'Review the Boxing SA Q1 submission' (Due 22 Sept 2026), and 'Advise whether HER-3.4 may be reported cumulatively' (Due 26 Sept 2026).

- **Four counts** across the top: submissions **awaiting your decision**, figures **returned** to an entity, entities that have **filed nothing**, and submissions **approved**.
- **Start with these three:** the three entities at the top of the risk ranking, each with the single **largest factor** behind its score, written in words.
- On the right, **quick actions** and **My tasks**.

Click **The whole queue, ranked**.

Step 2. The review queue, ranked by risk

The queue lists every entity for Q1, **ranked by risk rather than by the date it arrived**, so the ones that most need attention are at the top.

Q1 2026/27

28 entities, 11 submitted, 16 outstanding, 1 returned

Sorted by: **risk** entity date received

1 **45 MEDIUM** **2** **Robben Island Museum** not submitted

Largest factor: Filed 70 days after a statutory PFMA deadline. This is a breach of the Act, not of a departmental instruction. Nothing has been opened for this period.

see the entity >

33 MEDIUM **Boxing South Africa** Submitted

Largest factor: Submitted an average of 25 days past the departmental due date across 1 prior periods. Quarterly performance reporting for a Schedule 3A entity has no deadline in regulation, so this is measured against the department's own instruction. 7 of 18 targets reported, 1 evidence documents, submitted 25 days late

open >

29 MEDIUM **National Library of South Africa** Returned

Largest factor: Submitted an average of 12 days past the departmental due date across 1 prior periods. Quarterly performance reporting for a Schedule 3A entity has no deadline in regulation, so this is measured against the department's own instruction. 10 of 18 targets reported, 3 evidence documents, submitted 12 days late

open >

sport, arts & culture
Department: Sport, Arts and Culture
REPUBLIC OF SOUTH AFRICA

Better reporting. Stronger institutions. A brighter South Africa.

1. The **risk score** and its band. The number and the word are always shown, not only the colour.
2. The **entity**, its status (Submitted, Returned, Approved or not submitted), its largest factor, and how many figures and evidence documents it filed and how late.

Step 3. Ask why an entity is ranked where it is

Click Robben Island's score. A panel lists the **five signals** behind it, each with its weight, what it adds to the total, and a sentence explaining it.

Robben Island Museum 45 MEDIUM

Computed from the signals stored for this reporting period.

Signal	Weight	Contributes
Submission lateness	0.30	30.0
Filed 70 days after a statutory PFMA deadline. This is a breach of the Act, not of a departmental instruction. Raw 70,00, weighted to 30,0 of a possible 30		
Evidence gap	0.25	0.0
No targets registered for this year. Raw 0,00, weighted to 0,0 of a possible 25		
Spend to delivery divergence	0.20	0.0
Delivery (0%) is keeping pace with spend (0%). Raw 0,00, weighted to 0,0 of a possible 20		
Prior audit findings	0.15	15.0
Audit outstanding. The financial statements missed the statutory date, the audit was not completed, and the entity was excluded from the portfolio audit outcomes. There is no assurance of any kind on this entity. Raw 0,00, weighted to 15,0 of a possible 15		
Revision churn	0.10	0.0
No targets restated mid-year. Raw 0,00, weighted to 0,0 of a possible 10		

The five signals are: how late it files, how much of its reporting has no evidence, whether spending is running ahead of delivery, its audit findings, and whether it changed its targets mid-year. The score is arithmetic, not a guess: anyone can add it up from this panel. Robben Island scores 45 because it filed 70 days after a legal deadline and its audit is outstanding.

Close the panel.

Step 4. Open Iziko's Q1 submission

Find Iziko Museums in the queue and click **open** (1).

Review queue

Recompute scores

Q1 2026/27

Returned to the entity with one figure to correct.

28 entities, 10 submitted, 16 outstanding, 2 returned

Sorted by **risk** entity date received

45 MEDIUM

Robben Island Museum

not submitted

Largest factor: Filed 70 days after a statutory PFMA deadline. This is a breach of the Act, not of a departmental instruction. Nothing has been opened for this period.

see the entity >

33 MEDIUM

Boxing South Africa

Submitted

Largest factor: Submitted an average of 25 days past the departmental due date across 1 prior periods. Quarterly performance reporting for a Schedule 3A entity has no deadline in regulation, so this is measured against the department's own instruction. 7 of 18 targets reported, 1 evidence documents, submitted 25 days late

open >

29 MEDIUM

National Library of South Africa

Returned

Largest factor: Submitted an average of 12 days past the departmental due date across 1 prior periods. Quarterly performance reporting for a Schedule 3A entity has no deadline in regulation, so this is measured against the department's own instruction. 10 of 18 targets reported, 3 evidence documents, submitted 12 days late

Step 7. Approve Boxing South Africa

Open **Boxing South Africa** from the queue. Satisfied with it, click **Approve all 18 figures**. The dialog warns how many figures have no evidence: approving does not change that, and they stay on the record as unverifiable. Click **Approve**.

Vuka user manual

17 of 52

Back in the queue, the line at the top confirms it, and Boxing South Africa reads **Approved**. Approval is recorded with the reviewer's name and the time, one submission at a time.

Step 8. The risk picture across all 28

Click **Risk & Alerts** in the menu. This is the early warning view: how many entities are in each band, and every entity with its band, its largest factor, its score, and whether it has reported.

The bands are fixed and published: 70 or above is critical, 50 to 69 high, 25 to 49 medium, below 25 low. The reviewer's journey ends here.

3. The reporter

In short: The reporter at an entity is warned when a quarter is nearly due, answers any figure the Department sent back, and files the quarter from a spreadsheet, attaching the document behind each figure. Every figure they confirm is recorded in their name.

Signs in as: Entity reporter (N. Mabaso, Iziko Museums of South Africa).

The journey: read the deadline warning, answer the figure the reviewer returned and send Q1 back, then download, fill, upload and check the Q2 template, attach evidence, confirm and submit.

Step 1. Sign in and read the warning

Because Q2 is now due within 30 days and nothing has been filed for it, Vuka warns you as soon as you sign in.

The screenshot shows the Vuka reporting interface. On the left is a dark sidebar with the Vuka logo and navigation links: My reporting, Documents, Workspaces, Tasks (with a red badge '3'), and Citizen View. The main content area is titled 'Iziko Museums of South Africa' and shows a reporting status for N. Mabaso. A prominent yellow warning box in the center states: 'Q2 2026/27: due 09 Oct 2026. Nothing has been filed for this quarter. Reminders go to your inbox at thirty days, fifteen days and on the last day.' Below this, there are buttons for 'Report Q2 2026/27 now' and 'Later'. The interface also displays a 'Waiting on you' message and a 'Prior periods' table showing Q1 2026/27 as 'Returned' with '20 of 20 reported' and a status of 'submitted 11 days late'. A top navigation bar includes a search bar, language settings (English), and user information (N. Mabaso, Entity reporter).

It says when Q2 is due and that reminders come by email at 30 days, 15 days and on the last day. **Report Q2 2026/27 now** goes straight to it. Click **Later** for now: something else comes first.

Step 2. Your reporting

You land on **My reporting**. There is no entity to choose: Iziko's name comes from your account.

Iziko Museums of South Africa

Reporting as N. Mabaso. The entity is taken from your signed token, which is why there is nothing here to choose.

1. Q1 2026/27 was returned to you by L. Dlamini 19 Sept 2026 04:54
1 figure disputed. See the comment against each target.

HER-1.1 The register extract lists three exhibitions opening in Q1, but 2 is reported. Please check which figure is right. L. Dlamini, 19 Sept 2026 04:54
Only these figures were reopened. Everything else stays as filed, with the original confirmation and its author on the record. Reply against a figure on the next screen and the reviewer sees it within seconds.

2. Answer the disputed figure >

3. Q2 2026/27
01 Jul 2026 to 30 Sept 2026
Due 09 Oct 2026
20 days left

Not a statutory date. A date the Department set. Enforceable as an instruction rather than as law.

Enter figures Upload completed file Download template Capture on a phone

Waiting on you. No submission has been opened for this period. Next: download the template, or capture on a phone.

Prior periods The lateness signal in your risk score is computed from these rows and nothing else.

Period	Status	Count	Notes
Q1 2026/27	Returned	20 of 20 reported	submitted 11 days late

1. At the top, **Q1 2026/27 was returned to you by L. Dlamini**, with the time, and the one disputed figure with the reviewer's reason in their own words. It appears as soon as the reviewer returns it, without reloading the page.
2. **Answer the disputed figure** opens it.
3. Under it, **Q2 2026/27**: due 9 October, 20 days left. **Not a statutory date** means the Department set it as an instruction.

Click **Answer the disputed figure**.

Step 3. Answer the returned figure

Only HER-1.1 is open again. The other 19 figures stay exactly as you filed them. The Department's reason sits above the figure.

1. Type the corrected figure (1). Here, 3.
2. Say what changed in the note (2).

Q1 2026/27
No file has been parsed for this period. Figures entered here are marked as entered by hand.

19 of 20 confirmed, 5 with evidence

Attach evidence files

Nothing here is saved as a reported result yet. Confirming writes these figures in your name, and they cannot be edited afterwards. A correction happens by the Department returning the submission.

1 figure was returned for correction. Everything else stays as filed. [Show all 20 figures](#)

HER-1.1 **Number of exhibitions mounted** **REOPENED FOR CORRECTION**

The Department disputed this figure. The register extract lists three exhibitions opening in Q1, but 2 is reported. Please check which figure is right.

	QUARTER TARGET	ANNUAL TARGET	VARIANCE
2 Entered by hand, no source cell	3	12	0 (0%)

Reported figure (exhibitions and collection items) **3**

Note for the Department (optional)
Corrected to 3. The register was right: three exhibitions opened in Q1, and the third was left off our spreadsheet.

No result this quarter because

19 of 20 confirmed **Confirm 1 ready** [Submit to the Department](#)

Figures in a spreadsheet? Copy the column and paste it into the first box: it fills the rows below in order. Or copy two columns, code and figure, to match by code.

Every target needs either a confirmed result or a recorded reason for having none before the period can be submitted.

Further down, under **Comments on these figures**, reply to the reviewer. They see the reply within seconds.

Comments on these figures

HER-1.1 Number of exhibitions mounted

L. Dlamini · DSAC review · 19 Sept 2026 04:54
The register extract lists three exhibitions opening in Q1, but 2 is reported. Please check which figure is right.

N. Mabaso · entity · 19 Sept 2026 04:56
Thank you. Corrected to 3; the register extract is attached against HER-1.1.

Reply

[Send reply](#)

Step 4. Confirm and send Q1 back

Click **Confirm 1 ready** at the bottom. Vuka shows the figure you are about to confirm and reminds you what confirming means: it is recorded **in your name** and **cannot be edited afterwards**.

Click **Confirm**, then **Submit to the Department**. The summary shows 20 targets, all with a result, and how many have evidence. Click **Submit**.

The corrected 3 does not replace the 2. Both stay on the record, each with who confirmed it and when.

Step 5. Start Q2

Back on My reporting, Q1 now reads **Submitted**, and Q2 is waiting.

1. **Download template** (2) gives an Excel file already filled with Iziko's 20 targets, their indicator codes and the quarter. You type your actual figures into it and save it. Do not rename sheets or move rows: Vuka matches each row by its indicator code.
2. When it is filled in, click **Upload completed file** (1).

Step 6. Upload the template

Click **Choose file** and pick the saved template (1), then **Upload and parse** (2).

Vuka reads it and says what it found (3): 21 rows read, 20 matched a registered target. The row whose code matches nothing is **held aside**, not thrown away. **Nothing is saved as a reported figure yet.**

Click **Review what was read**.

Step 7. Check what Vuka read

Every target has its own row.

The screenshot shows the Vuka interface for reviewing a target. The left sidebar contains navigation links: My reporting, Documents, Workspaces, Tasks (with a red badge '3'), and Citizen View. The main content area is titled 'Iziko Museums of South Africa' and 'Q2 2026/27'. It shows a status of '0 of 20 confirmed, 0 with evidence' and an 'Attach evidence files' button. A red box labeled '1' highlights a warning: 'Nothing here is saved as a reported result yet. Confirming writes these figures in your name, and they cannot be edited afterwards. A correction happens by the Department returning the submission.' Below this, a target 'HER-1.1 Number of exhibitions mounted' is shown. A red box labeled '2' highlights a note: 'The Department disputed this figure. The register extract lists three exhibitions opening in Q1, but 2 is reported. Please check which figure is right.' A table follows with columns: QUARTER TARGET, ANNUAL TARGET, and VARIANCE. A red box labeled '3' highlights the first row: 'from Quarterly Report!F11', '3', '12', and '0 (0%)'. Below the table, there are input fields for 'Reported figure (exhibitions and collection items)' (containing '3') and 'Note for the Department (optional)'. A red box labeled '3' highlights an 'attach' button. At the bottom, there are buttons for 'Confirm 19 ready' and 'Submit to the Department', along with a 'Confirm 2' button. A footer section contains the text: '0 of 20 confirmed', 'Confirm 19 ready', 'Submit to the Department', and instructions on how to use the spreadsheet data.

1. The reminder that nothing here is saved until you confirm it.

2. The figure Vuka read and **the cell it came from**, for example *from Quarterly Report!F11*, beside the quarter target, the annual target and the difference.

3. **attach**, to add evidence (step 9).

Nineteen rows are ready. One needs you.

Step 8. Fill the gap

HER-1.3, public education programmes, says **Not parsed**: the spreadsheet had nothing in that cell. Its **Confirm** button is off.

HER-1.3 **Number of public education programmes delivered**

⚠ **Not parsed.** No value for this indicator was found in the uploaded file. Enter it here, or record that there is no result this quarter.

Reported figure (exhibitions and collection items) Note for the Department (optional)

☐ No result this quarter, because

⚠ No evidence attached. This figure will show to the Department as **unverifiable**, which is different from unverified. [attach](#)

[✓ Confirm](#)

Type the figure. Here the programme delivered 2 against a quarter target of 6, which is more than 20 percent short, so Vuka asks for a **Reason for the variance (required)** before it lets you confirm.

HER-1.3 **Number of public education programmes delivered**

⚠ **Not parsed.** No value for this indicator was found in the uploaded file. Enter it here, or record that there is no result this quarter.

Reported figure (exhibitions and collection items) Reason for the variance (required)

2

A variance past 20 percent needs a reason before you can confirm. Giving it now avoids the submission being returned, which costs about two weeks.

☐ No result this quarter, because

⚠ No evidence attached. This figure will show to the Department as **unverifiable**, which is different from unverified. [attach](#)

[✓ Confirm 2](#)

Write the reason. A shortfall with no reason is the most common reason a submission is returned.

HER-1.3 **Number of public education programmes delivered**

⚠ **Not parsed.** No value for this indicator was found in the uploaded file. Enter it here, or record that there is no result this quarter.

Reported figure (exhibitions and collection items) Note for the Department (optional)

2

Two programmes moved to October when the education centre closed for roof repairs from 4 August.

☐ No result this quarter, because

⚠ No evidence attached. This figure will show to the Department as **unverifiable**, which is different from unverified. [attach](#)

[✓ Confirm 2](#)

(If there were genuinely nothing to report, you would tick **No result this quarter, because** and say why instead.)

Step 9. Attach the evidence

Evidence is what lets the Department trace a figure back to a source document.

1. Click **attach** on HER-1.3.
2. Choose the document (1).
3. Tick which part of the Auditor-General's test it satisfies (2): **Validity** (it happened), **Accuracy** (the numbers are right), **Completeness** (nothing was left out).
4. Click **Attach** (3).

Every target needs either a confirmed result or a recorded reason for having none before the period can be submitted.

No result this quarter, because

Attach evidence

HER-1.3 Number of public education programmes delivered

The test being satisfied is the Auditor-General's reliability test: can this reported figure be traced back to a source document. An attendance register, a signed report, a photograph or an invoice all satisfy it. A figure with nothing attached is unverifiable, which is worse than unverified.

1 The document

Choose file Attendance-register-Q2.pdf

2 Which part of the reliability test it satisfies

☒ Validity. The reported figure actually occurred and relates to this entity.

☐ Accuracy. The amounts and quantities are recorded correctly.

☒ Completeness. Everything that should have been recorded was.

Evidence may be attached after submission. Withholding it is worse than attaching it late.

Cancel Attach

The document now shows under the figure with a green shield.

4. The executive

In short: The executive sees all 28 entities on one page, opens any one to see what it was given, what it promised and what it delivered, can explain its risk score, follows the trends over the years, and asks Karabo questions in ordinary words. Nothing on these screens changes a figure.

Signs in as: DSAC executive (Director-General).

The journey: read the portfolio, open Boxing South Africa, explain its score, check its unit cost, look at the trends in Analytics, and ask Karabo.

Step 1. The portfolio

After signing in you land on **Portfolio**, for Q1.

1. **The totals** across the top: R2.258bn allocated this year, 28 funded bodies, how many submitted Q1, targets reported against targets registered, submissions outstanding, and critical entities.
2. **By risk band**: every entity grouped by band, with its score and its allocation. The sector buttons above narrow it to arts, heritage, libraries, sport or language.
3. **Ask Karabo**, for step 6.

The allocations are the published figures from the Estimates of National Expenditure 2026, Vote 37, Table 37.3.

Step 2. Open Boxing South Africa

Click **BoxingSA** in the medium band (1).

Every band shows its score and its word as well as its colour, because a briefing note goes out in greyscale. Click any name for the figures behind its score.

MEDIUM 4	RobbentIsland why 45 R96.8m	BoxingSA why 33 R21.5m	NLSA why 29 R137.9m	PanSALB why 26 R139.2m	
LOW 24	FreedomPark why	Iziko why	PACOFs why	Ditsong why	Playhouse why

The entity page follows the money from left to right: what it was **allocated**, what it **promised** (targets in its Annual Performance Plan), what it **reported**, and how much of that is **verified** with evidence. Each figure names the document it comes from. Under it are the allocation year by year and the Auditor-General's audit history.

Ask Karabo

Boxing South Africa

33 MEDIUM

Computed from the signals stored for this reporting period.

Submission lateness

weight 0.30 contributes 18,0

Submitted an average of 25 days past the departmental due date across 1 prior periods. Quarterly performance reporting for a Schedule 3A entity has no deadline in regulation, so this is measured against the department's own instruction.

Raw 25,00, weighted to 18,0 of a possible 30

Evidence gap

weight 0.25 contributes 7,2

11 of 18 targets have no confirmed result, with 47% of the year elapsed.

Raw 0,61, weighted to 7,2 of a possible 25

Spend to delivery divergence

weight 0.20 contributes 2,3

16% of allocation drawn against 4% of target delivered.

Raw 0,12, weighted to 2,3 of a possible 20

Prior audit findings

weight 0.15 contributes 5,0

1 audit finding(s), of which 1 repeat from a prior year.

Raw 2,00, weighted to 5,0 of a possible 15

Revision churn

weight 0.10 contributes 0,0

No targets restated mid-year.

Raw 0,00, weighted to 0,0 of a possible 10

Total

32,5

Close it and click **Unit cost** (2).

Step 4. Unit cost

Pick an indicator. Vuka compares what it costs to deliver one unit three ways, always showing both sides of each sum so anyone can check it:

- **Against its own plan:** planned spend over planned units, beside actual spend over actual units.
- **Against its own history,** where there is a record.
- **Against sector peers:** only other entities in the same sector.

Vuka never compares cost across sectors. A library book and a boxing licence are not the same kind of thing, so there is no screen that pretends they are.

Step 5. Is the portfolio getting better?

Click **Analytics & Insights** in the menu. Four headline measures across the top, then the portfolio drawn as charts: money and delivery year on year, audit outcomes, who filed on time, each sector, and which entities moved up or down.

- A year the Auditor-General has not yet audited draws **no bar**, never a bar of zero.
- **Show the figures** beside each chart opens the exact table it was drawn from.
- **Download as CSV** (2) and **Print or save as PDF** (3) take it to a committee meeting.

Step 6. Ask Karabo

Click **Ask Karabo** (1). Karabo opens beside the page. Click a suggested question, or type one. Here: *Why is Robben Island scored critical?*

Transparent. Accountable. Impactful.

Karabo

Ask about any body the Department funds

Department funds, in ordinary words, and I will answer with the figure and where it came from.

I answer from Vuka's own records, with exactly what your account can see. Under each answer I show where the figure came from. If the record does not show something, I will say so rather than guess.

Why is Robben Island scored critical?

The record does not show Robben Island Museum as critical. Robben Island Museum has a risk score of 45 and band medium, according to Vuka risk engine, stored signals for Q1 2026/27. The score comes mainly from submission lateness (filed 70 days after a statutory PFMA deadline; contribution 30) and a prior audit finding (audit outstanding; contribution 15); other signals contributed 0, according to Vuka risk engine, stored signals for Q1 2026/27.

WHERE THIS CAME FROM

- Robben Island Museum, risk score: Vuka risk engine, stored signals, Q1 2026/27

Karabo answers only from Vuka's records, with your own access, and can still be wrong. Check the source under each answer.

Karabo corrects the question: Robben Island is scored 45, medium, not critical. It lists the signals behind the score and, under **Where this came from**, the record it read. It answers only from Vuka's records, with the executive's own access, and says so when the record does not hold the answer.

Ask a follow-up in the same conversation: *How is Iziko doing this quarter?*

The executive's journey ends here.

5. The public

In short: Anyone, with no account, can see what each published entity received, promised and delivered, in five languages, on a phone, and ask Karabo about it. They only ever see what the Department has chosen to publish.

Signs in as: nobody. The screenshots are taken at phone size.

The journey: open the citizen view, open Artscape's record, go on to Artscape's own website, switch to isiZulu, try the light version, then ask Karabo from the landing page.

Step 1. Open the citizen view

Go to the Vuka address followed by `/public` , or click **Citizen View** on the landing page.

Search for an organisation by name, or tap a group: **Sport**, **Arts** or **Culture** (heritage, libraries and language bodies are under Culture). The six organisations the administrator published are the only ones here.

Step 2. Open Artscape

Each card shows the organisation's group, its allocation for the year, the last quarter it reported with the Department's approval, and how many targets it has achieved. On Artscape's card, tap **View organisation** (1).

The record follows the money in three steps, under **The accountability chain**: **01. Received** (what it was allocated), **02. Promised** (the targets it committed to this year) and **03. Delivered** (targets with a result in an approved report). Each figure names the document it comes from.

Only results the Department has approved are counted here. A figure still with its reviewer is not shown to the public as delivered.

Step 3. Go to Artscape itself

Under **Useful links**, **Visit Artscape** (1) opens Artscape's own website in a new tab, for the questions Vuka does not answer: what is on, how to visit, who runs it.

Figures are as reported by the entity and reviewed by the Department of Sport, Arts and Culture. Published with departmental approval.

Funding

Allocation **R 73 801 000**

Programme **Programme 3: Arts and Culture Promotion and Development**

Financial year **2026/27**

Source: Estimates of National Expenditure 2026, Vote 37, Table 37.3, 2026/27

Useful links

[Visit Artscape ↗](#)

This is the entity's own website. It opens in a new tab, and Vuka does not control what is published there.

Where did this information come from?

Each figure on this page names the document it comes from, so you can trace it back.

Accountability history

Audit outcomes published by the Auditor-General

2024/25

The page says plainly that it is the organisation's own website and not a government page.

Step 4. Read it in isiZulu

Choose **isiZulu** from the language picker at the top. English, Afrikaans, isiZulu, isiXhosa and Sesotho are available.

Step 5. The light version

On a slow connection or a small data bundle, tap **Light version, uses less data** at the bottom. The same organisations and figures, as plain text. Vuka also picks it by itself when the phone asks to save data or has a slow connection.

Public entity performance

What each funded body received, what it committed to deliver, and what it reported.
Department of Sport, Arts and Culture.

Artscape Arts · R 73 801 000 allocated · 4 of 12 targets achieved

Karabo
Ask about any body the Department funds

I am Karabo. Ask me about any body the Department funds, in ordinary words, and I will answer with the figure and where it came from.

I answer from what the Department has published: allocations and how many targets each entity achieved. Under each answer I show where the figure came from. Staff who sign in can also ask about deadlines, risk and evidence.

What was Iziko allocated this year?

Iziko Museums of South Africa was allocated R110.6 million for 2026/27, according to the Estimates of National Expenditure 2026, Vote 37, Table 37.3.

WHERE THIS CAME FROM

- Iziko Museums of South Africa, allocation 2026/27: Estimates of National Expenditure 2026, Vote 37, Table 37.3
- Iziko Museums of South Africa, target outcomes: Figures confirmed in Vuka, published by DSAC

Ask about an entity, a figure or a deadline...

Karabo answers only from Vuka's records, with your own access, and can still be wrong. Check the source under each answer.

Karabo answers from what the Department has published, and shows **Where this came from**. A visitor who asks about something only staff can see, here *Why is Robben Island scored critical?*, is told that risk scores are for staff who sign in, and is given the published figures instead.

Ask about any body the Department funds

I answer from what the Department has published: allocations and how many targets each entity achieved. Under each answer I show where the figure came from. Staff who sign in can also ask about deadlines, risk and evidence.

What was Iziko allocated this year?

Iziko Museums of South Africa was allocated R110.6 million for 2026/27, according to the Estimates of National Expenditure 2026, Vote 37, Table 37.3.

WHERE THIS CAME FROM

- Iziko Museums of South Africa, allocation 2026/27: Estimates of National Expenditure 2026, Vote 37, Table 37.3
- Iziko Museums of South Africa, target outcomes: Figures confirmed in Vuka, published by DSAC

Why is Robben Island scored critical?

The published record you can access does not show why Robben Island is scored critical. Reasons for risk scores are available to Department and entity staff who sign in.

Ask about an entity, a figure or a deadline...

Karabo answers only from Vuka's records, with your own access, and can still be wrong. Check the source under each answer.

The public's journey, and the demonstration, end here.

Demonstration script

In short: About twelve minutes, five journeys, one person at a time. Lines in plain text are what you say. Lines in *italics* are what you click. You don't need to learn it word for word; say it your way, but keep the order.

Before you go on

Do these in the hour before, not in front of the panel.

1. In one terminal, give Karabo its model, then reset and start the demo copy:

```
export AZURE_OPENAI_ENDPOINT=https://<resource>.openai.azure.com
export AZURE_DEPLOYMENT_NAME=<deployment name>
export AZURE_OPENAI_API_KEY_FILE=/path/to/file/holding/the/key
./run-demo.sh --reset
```

2. In a second terminal: `cd frontend && VITE_DEV_AUTH=true npm run dev`, then open `http://localhost:5173`.
3. Have the filled Q2 template to hand: `~/vuka/demo/Iziko_Q2-2026-27_completed.xlsx`, and one small PDF to attach as evidence.
4. Open the **Ask Karabo** tab once. The first message should say what it answers from. If it says it isn't connected, go back to step 1.
5. Close every other window. Zoom the browser to 110 percent so the back of the room can read it.

To switch person, sign out (top right), click **Sign in**, and pick the role from the **Demonstration accounts** panel at the bottom of the sign-in page.

Opening (30 seconds)

Landing page on screen.

Every quarter, the 28 bodies the Department of Sport, Arts and Culture funds have to report what they delivered against what they promised. Today that happens by email and spreadsheet, deadlines slip, and nobody can say where a number came from.

Vuka fixes that. Every figure carries the cell it came from, the document behind it, and the name of the person who confirmed it. I'm going to show you one quarter through the eyes of five people: the administrator, the reviewer, a reporter at Iziko Museums, the Director-General, and a member of the public.

1. The administrator (2 minutes)

Sign in as Administrator.

This is the administrator at the Department. They decide three things: when reports are due, who is allowed to report, and what the public gets to see.

Point at the Submission deadlines table.

First, deadlines. Every one of these entities is Schedule 3A, and the regulations don't set a day count for their quarterly report. So the date is the Department's call, and it's set here, once, for everyone.

In the Q2 row, set the date to about three weeks from today. Click Set.

I've brought Q2 forward. That one date now drives every reporter's countdown, the reminders at 30 days, 15 days and on the day, and the lateness score. And once a date has passed, you can't move it, because lateness was already measured against it. You can see Q1 is locked.

Scroll to Entities and their reporters. On Artscape, click Issue an account, fill in a name and email, confirm.

Second, who can report. There's no sign-up in Vuka. The Department issues each reporter an account for one entity, and that entity is written into the account itself. So Thabo can report for Artscape and nothing else. He can't pick another entity, because there's nothing to pick.

Click Publish on Artscape, Iziko, Robben Island, Boxing SA, SAHRA and the Market Theatre.

Third, what the public sees. Nothing is public until the Department publishes it. And notice what the administrator can't do: they can't touch a figure, and they can't approve one. Publishing and approving are deliberately two different people.

2. The reviewer (3 minutes)

Sign out. Sign in as DSAC reviewer.

Now the reviewer. Q1 reports came in over August, and this is where they start their day.

Point at the four counts, then at Start with these three.

It tells them what's waiting, and which three entities to look at first. Not the first three that arrived: the three most at risk.

Click The whole queue, ranked. Click Robben Island's score.

Here's the whole queue, ranked by risk. And every score explains itself. Robben Island is at 45. That's five signals, each with a weight: it filed 70 days after a legal deadline, and its audit is outstanding. There's no black box here. It's arithmetic you could do on paper, which matters when you have to defend it in a committee.

Close the panel. Find Iziko and click open.

Let's open Iziko's Q1 filing. Every figure sits next to where it came from and the evidence behind it. You can open any document right here.

On HER-1.1, click Dispute this figure. Type a reason. Click Mark disputed.

This one says two exhibitions, but the register they attached lists three. I don't edit it. Nobody can edit a confirmed figure in Vuka, not even me. I dispute it, and say why.

Point at the bottom bar, then click Return 1 figure to the entity, and confirm.

See how the button changed on its own: approve became return. Only that one figure goes back. The other nineteen stay exactly as Iziko filed them.

Open Boxing South Africa. Click Approve all 18 figures, then Approve.

And when I'm happy, I approve. It's recorded with my name and the time. If some figures have no evidence, Vuka tells me first, and they stay marked as unverifiable.

Click Risk & Alerts in the menu.

This is the early warning view across all 28, by band, with the reason for each in plain words.

3. The reporter (3 minutes)

Sign out. Sign in as Entity reporter.

Now I'm the reporting officer at Iziko Museums.

The deadline warning is on screen.

The first thing they see is the warning about the date the administrator just moved. Q2 is due in twenty days. I'll come back to it.

Click Later. Point at the returned notice.

And there's the reviewer's return, in the reviewer's own words, against that one figure. It arrived without anyone refreshing anything.

Click Answer the disputed figure. Type 3, write a short note, confirm, submit.

Only the figure in question is open. I correct it to three and say why. When I confirm, it's in my name and it can't be edited afterwards. And the two isn't erased. Both stay on the record, with who confirmed each one and when. That's the audit trail the Auditor-General asks for.

Back on My reporting, click Upload completed file. Choose the template. Click Upload and parse.

Now Q2. Most entities work in Excel, so we meet them there. They download a template that's already filled with their own targets, type in their figures, and upload it. Twenty-one rows read, twenty matched. The one we don't recognise is held aside, not silently dropped.

Click Review what was read. Point at a source cell.

Every figure shows the exact cell it came from. And nothing is saved until the reporter confirms it.

Scroll to HER-1.3. Type 2. Point at the reason box. Write a reason.

One row was blank. They delivered two against a target of six, and Vuka won't let them confirm a shortfall that big without a reason. That's the most common reason a report gets sent back, so we catch it here instead of two weeks later.

Click attach, choose the PDF, tick Validity and Completeness, Attach.

And the evidence. They say which part of the Auditor-General's test it satisfies. A figure with no evidence shows to the Department as unverifiable.

Click Confirm all 20, Confirm, Submit to the Department, Submit.

Confirm, submit, done. Twenty days early.

4. The executive (2 minutes)

Sign out. Sign in as DSAC executive.

Now the Director-General. This view is read only.

Point at the totals, then the risk bands.

R2.26 billion across 28 bodies, at a glance: who's filed, what's outstanding, and everyone grouped by risk. Those allocations are the real published figures, Vote 37.

Click BoxingSA.

Any entity opens like this: what it was given, what it promised, what it reported, and how much of that is actually backed by evidence. Plus its audit history from the Auditor-General.

Click Explain the score, close it, click Unit cost.

The same explanation the reviewer saw, so the Department only ever tells one story. And unit cost, compared against its own plan, its own history and its sector peers. Never across sectors: a museum visit and a boxing licence aren't the same thing, and we won't pretend they are.

Click Analytics & Insights. Scroll a little.

Is the portfolio getting better? Year on year, audit outcomes, who files on time, by sector. A year that hasn't been audited yet shows no bar, not a zero. And it all exports to a spreadsheet or a PDF for the committee.

Click Ask Karabo. Click Why is Robben Island scored critical?

And if you'd rather just ask, that's Karabo. I asked why Robben Island is critical, and it corrected me: it's medium, 45, and here's why. Every answer lists where it came from, and it only answers from Vuka's own records, with my access and nothing more.

5. The public (1 minute)

Sign out. Open Citizen View. Narrow the window to phone size if you can.

Finally, anyone at all, on a phone, no account.

Tap Artscape's View organisation.

What it received, what it promised, what it delivered. Only what the Department has approved and published.

Switch the language to isiZulu.

In five languages.

Go to the landing page, click Ask Karabo, ask What was Iziko allocated this year?

And the public can ask Karabo too. It answers from published figures only. Ask it about risk scores and it tells you that's for staff.

Closing (20 seconds)

So that's one quarter, end to end. A deadline set once, a report filed from Excel with the evidence attached, a figure questioned without ever being edited, and the whole picture for leadership and the public.

eQPRS is where the numbers go. Vuka is where they can be defended. Thank you.

If you're asked

"Isn't this what eQPRS already does?" eQPRS captures the numbers. It doesn't hold the evidence behind them, and it was built around departments. Every DSAC body is Schedule 3A, which no system currently serves. We fill that gap, and we export in the shape eQPRS takes.

"Is this real data?" The 28 entities and their allocations are real, from the 2026 Estimates of National Expenditure. Sixteen carry their published audit outcomes. The quarterly figures, comments and names are made up for the demo, because that data isn't published at this level.

"Could Karabo make something up?" It's told to answer only from what Vuka's records return, and the sources under each answer come from what it actually looked up, not from what the model wrote. It can still be wrong, which is exactly why the source is always there to check.

"Why isn't Robben Island critical?" Because the score only uses what's stored, and its reporting history in the system is thin. We'd rather show a defensible 45 than an impressive 74.

"Are the translations checked?" Not yet. They're machine drafted. The whole interface is built to be translated, so reviewing it is content work, and PanSALB, which is one of the 28, is the obvious partner.

"How is it secured?" No sign-up. Each reporter's account is tied to one entity, and every request is checked against it. The executive can read everything and change nothing. Publishing and approving are two different people. Nothing is public until it's published, and every action is on the audit trail.

"What isn't built yet?" Staff demographics and job creation aren't on a screen yet. Staff single sign-on through the Department's Microsoft directory isn't wired. And Microsoft 365 document syncing is built but hasn't been run against a live tenant.

Where each requirement in the brief shows up

Requirement	Where you showed it
(a) Analytics	Executive, steps 1 to 5: portfolio, entity page, audit history, Analytics, Karabo
(b) Early warning	Administrator step 2 (the date), reporter step 1 (the warning), reviewer steps 2, 3 and 8 (risk)
(c) Document repository	Reporter step 9 (evidence attached to each figure); reviewer step 4 (open it in place)
(d) Workspaces	Reporter steps 2 to 4 (the return and reply, live); reviewer steps 5 and 6
(e) Security and privacy	Administrator steps 3 and 4; the reporter seeing one entity; Karabo following each person's access
